

Jordan Telecommunications Company

ANNUAL REPORT 2022

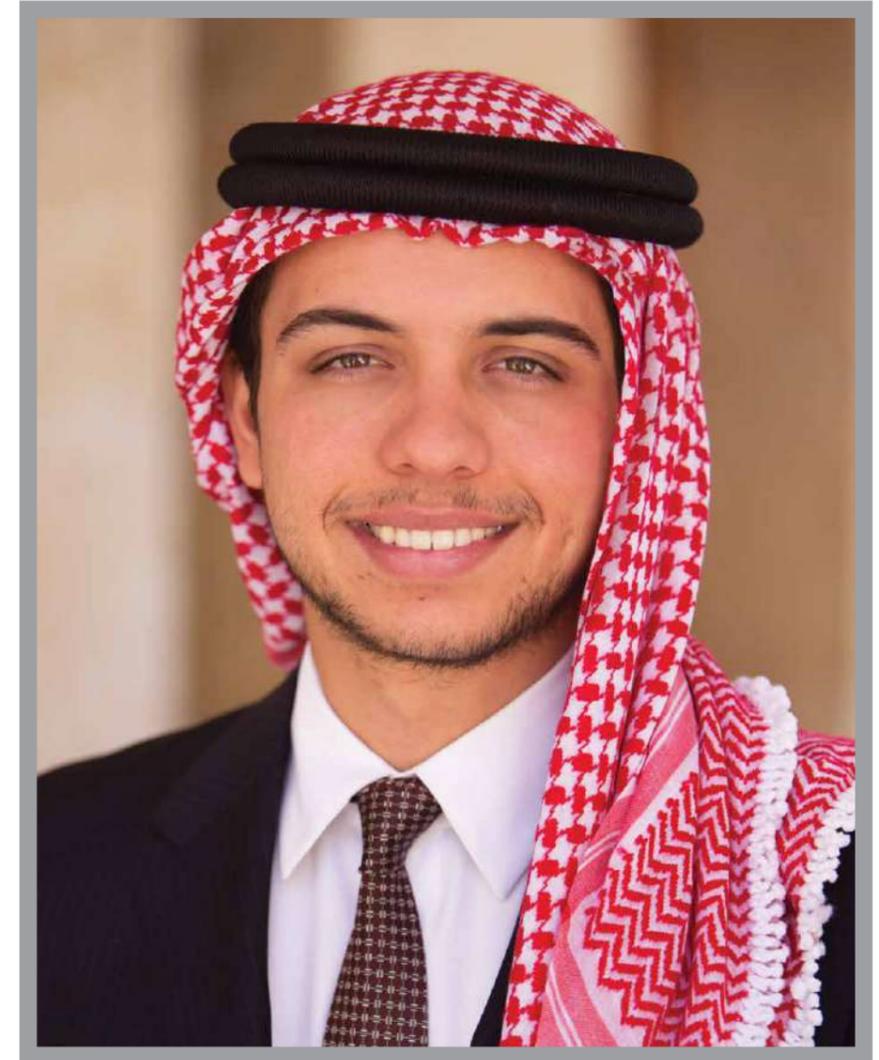

Wadi Rum as we see it in the future

“We want a future of excellence and creativity, that is open to change and development, accepts new ideas, and embraces diversity while building on our shared values, so that we remain a symbol of tolerance and altruism. These are the values enshrined by Jordan and that make our country a model of progress, openness, moderation, and authenticity”

**Letter to Jordanians on 60th birthday**  
**30 January 2022**

**His Majesty King Abdullah II Ibn Al Hussein  
King of the Hashemite Kingdom of Jordan**

**His Royal Highness Crown Prince  
Al Hussein bin Abdullah II**

## A letter from the Chairman

Dear shareholders,

On behalf of the Board of Directors of Jordan Telecommunications Group (Orange Jordan), the Executive Committee and staff, I am pleased to welcome you to the 29th annual ordinary General Assembly meeting and to present to you the 2022 annual report, which covers the company's performance, the consolidated financial statements, the governance report and disclosures, as well as the 2023 business plan. For the first time, the management will present in June a "Sustainability Report" as per the guidelines of the Jordan Securities Commission.

We proudly achieved tremendous milestones in 2022. They include reinforcing our business model and financial performance, upscaling the solutions and services we provide to our dear customers and developing our digital channels.

Orange Jordan has maintained its leading position as a responsible digital provider, which allowed us to remain actively engaged in the National Economic Modernization Vision, which was launched under the patronage of His Majesty King Abdullah II. Our deeply rooted values and the sincere efforts of our teams give us an advantage in setting the standards for enriching people's lives and empowering other sectors to help driving the economic and social development of the country.

We have sustained remarkable growth during 2022 with JD 347.6 million in revenues, while operational costs closed at JD 297.3 million, allowing us to make a net profit of about JD 40 million after taxes. We are keeping about JD 8 million in retained earnings to support financing the investment in 5G network this year 2023.

A key landmark of 2022 was the signing of an agreement with the Telecommunication Regulatory Commission (TRC) that served to reasonably address key issues as well as to resolve some contentious financial matters and license prices. This will enable us to provide 5G services. The agreement also paves the way for a new era which will facilitate the national economy's digital transformation; an ongoing process in which we are honored to be partners.

The agreement has provided pillars for a clearer future for the sector and for Orange. Today planning is based on higher levels of certainty. The TRC has laid down the cornerstone for the launch of 5G, which will surely make a big difference in the ICT sector, and will ultimately empower other sectors with the creation of new promising opportunities for our economy and for our youth. On this note, allow me, on your behalf, to salute H.E the Prime Minister, the Government, and the TRC.

Digital advancement is a key element in our services as we are no longer a traditional telecom operator. In order for us to provide optimal state-of-the-art services to our customers, we take preemptive measures to meet their expectations and their needs. We offer them exceptional customer care in every step we take through the launched digital assets;

thus saving them time, effort and enhancing their experiences. Jood application and the pioneering efforts undertaken to upgrade the E-shop, the Smart Life Solutions, Orange Money (which has become a leader in E-payments services in the Kingdom as part of our efforts to enhance financial inclusion) in addition to My Orange (with a user portfolio of 718,000). Those are some of the outcomes of the continued attention to Jordan's digital advancement by the management and competent teams of Orange Jordan.

Our contribution to strengthening economic growth has been embodied in our support to the business sector, where we do not stop at providing optimum digital solutions, but we take the extra step to avail our expertise to improve performance and productivity as an enabler of digital transformation.

Orange Jordan was visibly present in the highlights of 2022 business activities, contributing to the Kingdom's digital acceleration. Our efforts were recognized through the Tier III Operational Sustainability Golden Certificate: the first on the Kingdom's level as well as on the level of Orange Group. This achievement was made possible through the excellence, effectiveness, reliability and high quality work of our Data Centers.

Our teams have also made considerable progress, having developed their digital skills, advanced their knowledge in tomorrow's technologies and enjoyed a work environment where cooperation, teamwork, ambitious goals, excellence and sense of loyalty have prevailed. All of us at Orange Jordan are loyal to the company as well as to the brand. The excellence that has characterized our work environment was rewarded with the Gender Equality European and International Standard (GEEIS) Certificate from Bureau Veritas for the second consecutive year. Also we are honored with the Diversity Certificate, obtained by Orange S.A. Additionally, we have obtained the ISO certificate for Safety, Occupational Health and Environment Management for the second consecutive time. 2022 once again has affirmed our capability to utilize technology to empower the youth; having succeeded in unlocking the youth's potential through enhancing their skills, and reinforcing their experience in the accelerating digital domains so that they are ready for the job market and are equipped to kick-start their projects. Our free digital programs have expanded to 50 locations across the Kingdom. In parallel, we have provided online training, with a total of 12,000 certificates presented to the graduates since the launch of those programs.

As a testament to our continued efforts in empowering the youth, 85% of the graduates of the Coding Academy by Orange are now employed, while innovators have created 100 prototypes in the Fabrication Lab at Orange Digital Village. In 2022, the Innovation Hub was inaugurated in the village, opening its doors to all those who wish to explore modern technologies-based innovations. Furthermore, we now have nine business incubators and accelerators spread across the Kingdom, all with the aim of propping up our youth for innovation.

The achievements I have listed above manifest our sincere loyalty to our society, as we view our responsibility toward developing our youth's capabilities and elevating their living standards as an unwavering obligation.

To close, I would like to thank the board members and Executive Committee, led by the CEO Mr. Thierry Marigny, as well as all the executive directors and employees. Achievements were only made possible through their efforts. I also extend thanks and appreciation to the Ministry of Digital Economy and Entrepreneurship as well as to the TRC for their productive efforts in developing the sector and addressing its challenges. My deepest gratitude goes to shareholders for their support and confidence in the board's vision and performance. Due appreciation also goes to Orange Group for its continued support for Orange Jordan. To our dear customers, I say thank you, I pledge to you our unstoppable best service.

High expression of respect and commitment to the good of your company and that of Jordan.

Dr. Shabib Ammari  
Chairman of Board of Directors

## A letter from the CEO

Dear shareholders,

The year 2022 was one of transformational growth for us. We continued to provide unmatched experiences to over 3.7 million individuals and business customers, relying on our reinvented model, advanced networks, expert teams, and innovative digital solutions.

For four years, we have been following our vision to be the responsible digital leader of the Kingdom, by offering the best digital environment to our customers, employees, and society.

We are transforming our revenue mix by consolidating our position as the best broadband provider and diversifying our revenue streams to be the multi-service telecom leader.

To achieve these objectives, we continue our persistent digital transformation to improve efficiency and customer experience. After returning to growth last year, we succeeded in improving our financial and operational performance, achieving a robust increase of our revenue by 4.2%, and EBITDAaL by 22.6%.

Our FTTH (Fiber to the Home) share is the largest in the market. We are investing in our coverage in Amman, and at the same pace in the other major governorates of Jordan (Irbid, Zarqa, Aqaba, Salt, Madaba, and Karak). As we realize that Fiber is the ultimate broadband technology, we are also investing in our equipment to provide the best speed and Wi-Fi technology. These efforts led to Orange Jordan's FTTH being awarded the fastest internet in Jordan for 2022 by the international website "SpeedChecker". At the same time, we have trained 587 technicians and customer care employees in our Wi-Fi Campus, to ensure that our teams are specialists in providing the best home Wi-Fi services to our customers.

We are continuing to improve our Smart Life solutions, a range of smart electric devices for home, including external and internal cameras, PIR motion sensor, SOS emergency button, alarm systems, doorbells, as well as plugs that allow users to reduce their electricity consumption, etc.

On the mobile front, I am proud to say that during this year, we launched the first-of-its-kind end-to-end digital experience through our new "Jood" application to grant our mobile customers the convenience and freedom of choosing the lines that cater to their needs and interests.

In mobile money, we achieved milestones with Orange Money becoming Jordan's number one PSP in the Kingdom, with more than 700,000 users, only 3 years after its launch. We launched international transfer services, enhancing customers' experiences with improved services and becoming the first wallet in Metaverse by signing an agreement with LivaatVerse, the first Arab metaverse platform.

Over the last 12 months, we strongly increased the number of users of our mobile application, My Orange, and Orange Money, alongside enhancing our digital customer experience. We also developed Big Data/AI (Artificial Intelligence) environment, with new efficient use cases, as we have witnessed through the startups of the Orange AI incubator, allowing us to test, validate and explore AI models algorithms. Some of the AI environments covered areas in gaming through "Manzel" startup, healthcare with "Larimar",

and education and training where Kinda used AI in teaching writing in an interactive method.

Reliable connectivity comes in parallel with our care for purposeful partnerships with businesses of all sizes operating across Jordan. Network management, hybrid cloud, AI-based solutions, and cyber security remained at the core of our B2B growth. We believe that with 5G, businesses are set to experience new use cases and novel ways to shape a more sustainable, responsible, and innovative future.

The year 2022 marks also the preparation of 5G network and operating model which will be the core of the future mobile business and technology for the upcoming years.

Moreover, we launched the first 5G pilot in our Boulevard shop and the Innovation Hub in Abdali, as we gear up for this advanced technology, taking the lead in fostering a culture of innovation in Jordan. We aspire to enrich these experiences even more with the 5G technology in the Kingdom. In terms of network, we accommodated +30% on the internet fixed usages by upgrading our IP core, scaling up our direct interconnection with main content providers, and doubled the capacity of our content delivery platforms. We invested intensively in our mobile network capacity to accommodate +30% increase of the internet traffic by upgrading our RAN using a new spectrum allocation (on 4G 2100M).

Our work environment has witnessed leaps as well; we received the Gender Equality European & International Standard (GEEIS) for the second year and the standard's diversity certificate for the first time. We empower our teams to nurture high levels of agility in all operations and remain an inclusive, caring, and result-oriented company.

This year, our free digital programs have expanded to more than 50 locations in Jordan, where we train youth, women, and persons with disabilities to enhance employability and promote innovation as a cornerstone for aspiring, feasible projects. We can mention some notable, new examples, such as the Innovation Hub with our partner the European Union, Orange Digital Villages in Aqaba and Irbid, the online training platform Orange Coursat, and the "gigancing program" which supported more than 1,000 people.

As a responsible digital leader, we are promoting a culture of innovation where everyone is empowered to explore unprecedented potentials of technology. Through the new 5G Lab and Innovation Hub, startups, businesses and even our employees can gain understating, experience, and create first-hand using 5G, AI, IoT, AR, VR, and Blockchain. Orange AI Incubator celebrated the graduation of the first cohort of projects, and our accelerator, BIG, expanded into new locations, while we remained committed to empowering women in entrepreneurship through the Amazing Woman award and inspiring Change through Digital World award.

Our responsibility towards the community is accompanied by our commitment to the environment. Our comprehensive approach in adopting circular economy and ensuring energy efficiency is bringing us closer to our Group's goal to reach zero carbon emissions by 2040. In 2022, we announced the Orange Forest, under the National Afforestation Project, as a new step to neutralize our carbon footprint and expand green spaces. Our three solar farms are producing 65% of our energy consumption. Reducing our CO2 emissions through energy-efficiency is at the core of ITN strategy; in early 2022, we succeeded to bring down the power consumption of our main 1 MW data center by 20%.

I would like to thank the members of the Board of Directors for their efforts, represented by the Chairman, Dr. Shabib Ammari, who is always a great visionary and supporter, and the executive management that went above and beyond to implement our strategy. I am very grateful to all our partners who are with us on a journey of transformation. To every employee, I would like to say thank you for being the driving force of excellence and progress, and I will continue to do all my best for you to find at Orange Jordan the conditions and level of trust necessary to perform and grow.

My appreciation goes to the Ministry of Digital Economy and Entrepreneurship and the Telecommunications Regulatory Commission. We are excited to achieve more for Jordan's ecosystem with 5G technology.

Finally, I look forward to the future, promising to remain at the forefront of digital leadership to empower people and businesses and keep them connected to all that matters to them.

## FINANCIAL REPORT

Unlimited speeds for Fiber network

### Financial Report 2022

We are pleased to present Jordan Telecom Group's (Orange Jordan) 2022 Annual Report, which provides an overview of our performance and business results for the year. The report highlights our ongoing progress and vital contribution to the development of information technology and communications in the Kingdom.

In 2022, the Jordan Telecom Group witnessed a 6.3% growth in retail market, a result of a strategic customer-centric approach and constant efforts to offer added value.

Our investment in fiber optics has expanded the broadband internet coverage, enabling users to enjoy a fast and reliable internet experience. As a leader in providing this service in Jordan, we continue to play a key role in enhancing social progress and contributing to the national economy, generating good revenues for our shareholders.

In August 2022, Orange Jordan signed a Settlement Agreement with TRC that became effective from 8/9/2022, Also we signed a 5G agreement, which we hope to launch soon in Jordan. This new technology will accelerate digital transformation and provide more opportunities for IoT, smart cities, and industrial solutions.

As part of our commitment to remain at the forefront of technological advancement, Jordan Telecom Group is continuously adopting the latest technologies and presenting innovative solutions on a larger scale, thereby unleashing a world of possibilities.

Presented below is a summary of the consolidated results for 2022 against 2021.

## Consolidated income statement:

(MJD)	2022	2021	Change %
<b>Revenues</b>	<b>347.6</b>	<b>333.5</b>	<b>4.2%</b>
<b>Operating Expenses</b>

\* Total Debt (Total Debt + Total Equity).

### Revenues

Group's consolidated revenues increased by 4.2%, achieving JD 347.6 million in 2022 compared to JD 333.5 million in 2021, mainly due to the growth in Fiber, mobile, and business services revenues.

### Operating expenses

The term Operating Expenses means the cost of services, administration expenses, selling and distribution expenses, provision for expected credit loss, government revenue share, business support fees, brand fees, depreciation, amortization, depreciation of right of use assets, and depreciation of renewable energy lease. The Group Operating Expenses increased by 3.7% to reach JD 297.3 million in 2022 against JD 286.7 million in 2021. The services' cost kept increased by 7.4%, reaching JD 125.3 million in 2022 compared to JD 116.7 million in 2021, mainly due to higher customer equipment, network maintenance and Orange Money payment cost.

Administrative expenses decreased by 11.5% to reach JD 26.1 million in 2022, compared to JD 29.4 million in 2021, mainly due to mainly due to lower sponsorship, legal fees and provisions.

Selling and distribution expenses and provision for expected credit loss increased by 5.8%, reaching JD 44.7 million in 2022, compared to JD 42.3 million in 2021 due to higher sales in telecom and financial services.

Government revenue share equals 6% of net revenue that Orange mobile is required to pay to the Telecommunications Regulatory Commission pursuant to the Mobile License Agreement. Government revenue share reached JD 6.4 million in 2022, increased by 40.5% from 2021 due to higher mobile revenues.

Business support fees represent what the Group is required to pay to Orange Group under the business support agreement. Business support fees of the Group reached JD 3.3 million in 2022, the same amount as in 2021.

Brand fees represent 1.6% of operating revenues that Jordan Telecom Group is required to pay to Orange Group for using the Orange brand in all Jordan Telecom Group subsidiaries. Brand fees of the Group reached JD 4.6 million in 2022, the same amount as in 2021.

Depreciation, amortization & impairment expenses increased by 1.3% to reach JD 78.3 million in 2022, compared to JD 77.2 million in 2021.

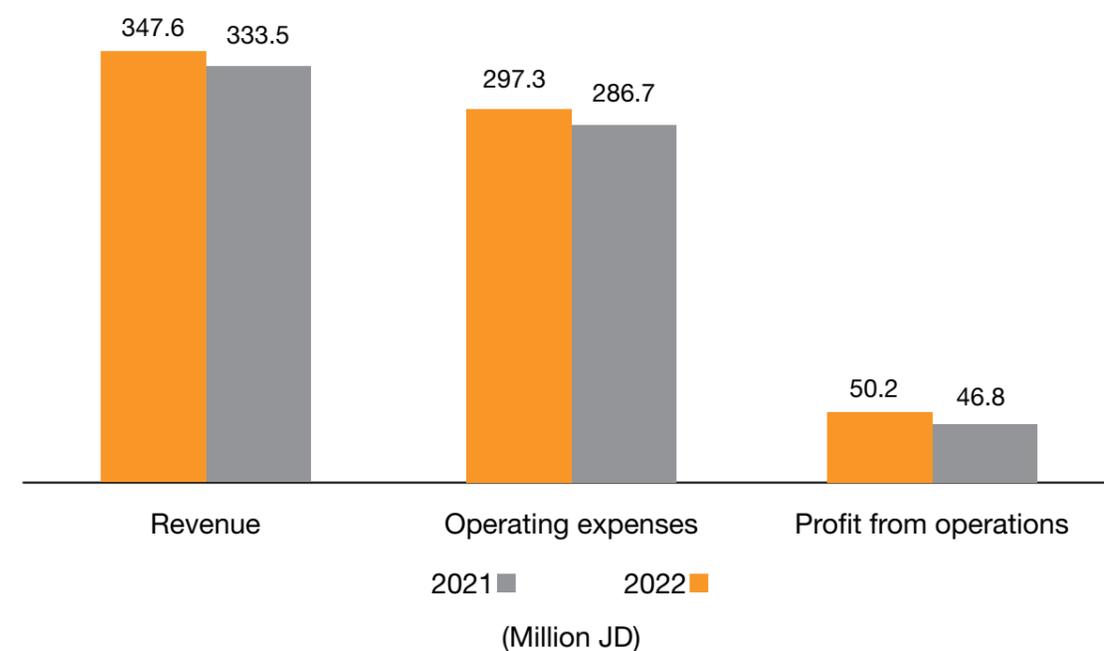

Depreciation of right-of-use assets increased by 0.7% to reach JD 6.6 million in 2022, compared to JD 6.5 million in 2021.

Depreciation of renewable energy lease represents the recognized liability toward solar farms project operator depreciated over the agreement period.

Depreciation of renewable energy lease reached JD 2.1 million in 2022, same in 2021.

### Profit from operations

Profit from operations consists of sales of services, less total operating expenses, including depreciation and amortization, and depreciation of renewable energy lease.

### Renewable energy lease interest expense

Renewable energy lease interest expenses refer to interest expenses on the Solar farms' project lease liability. Renewable energy lease interest expenses decreased by 8.1% reached JD 2.8 million in 2022 compared to JD 3.0 million in 2021.

### Lease interest expenses

Lease interest expenses refer to interest expense on the lease liabilities of Group premises and network site rentals for which the rent term is higher than 12 months. Lease interest expenses reached JD 2.4 million in 2022, the same amount as 2021.

### Net foreign exchange difference, finance costs, and finance income

Net foreign exchange difference is generated from the Group's transactions in foreign currencies and translation of monetary assets and liabilities. Finance costs consist of the interests and other charges, which are paid on the Group's financial indebtedness. On the other hand, Finance income consists of income earned on cash deposits in various currencies. The total cost of the three entries decreased by 9.4% to reach JD 4.6 million in 2022, compared to JD 5.1 million in 2021.

### Other income

Other income consists of gains and losses on dispositions of fixed assets and other miscellaneous income. Other income reached JD 22.4 million in 2022, compared to JD 2.0 million in 2021 due to the settlement impact.

### Income tax

In 2022 the Group reported JD 18.8 million as income tax, compared with JD 12.1 million in 2021.

### Profit for the year

Jordan Telecom Group generated JD 44.0 million as net profit after tax for 2022, with an increase of 68.5%, compared to JD 26.1 million in 2021. This increase came mainly due to higher revenues, higher margins, and the settlement impact.

### Net variation in cash and cash equivalent

Net cash flows from Operating Activities, the source of liquidity, increased by 25.0% to reach JD 135.0 million in 2022, compared to JD 108.0 million for 2021.

Net cash flows used in Investing reached JD 75.4 million in 2022, compared to JD 55.5 million in 2021.

Net cash flows from Financing Activities reached JD 57.5 million used in 2022, compared to JD 49.6 million used in 2021. The increase is due to dividends paid in 2022

### Cash and cash equivalent

Cash and cash equivalent increased by 88% to reach JD 7.2 million in 2022 compared to JD 3.8 million in 2021.

### Capital expenditures

for Jordan Telecom Group reached JD 114.9 million at the end of 2022, compared with JD 67.5 million at the end of 2021.

### Group subscribers

Jordan Telecom Group subscribers showed an increase of 11.6% to reach 3.7 million lines in 2022, compared to 3.4 million lines in 2021, due to the increase in fiber, mobile, and Orange money base.

### Human resources

Jordan Telecom Group's number of permanent contract employees decreased by 1.0%, from 1,594 in 2021 to 1,578 in 2022. The number of temporary contract employees decreased by 40.5%, from 111 in 2021 to 66 in 2022.

### Staff efficiency

The Group's efficiency indicator increased by 5.2% to reach JD 220.3 thousand revenue per permanent employee in 2022 compared to 209 thousand in 2021. The number of lines per employee reached 2,375 lines in 2022 compared to 2,149 lines in 2021, showing an increase of 10.5% against 2021.

## Group Business Segment analysis:

Presented below are the revenues for each business segment of the Group:

- Orange fixed and Orange internet
- Orange mobile
- Renewable energy
- Orange Money

(MJD)	2022	2021	Change%
<b>Revenues</b>			
Orange fixed & Orange internet	203.5	207.0	-1.7%
Mobile Communication	180.9	171.3	5.6%
Renewable energy	6.7	8.7	-23.1%
Orange Money	2.4	1.0	137.5%
Intercompany	(45.9)	(54.5)	-15.7%
Total Revenues	347.6	333.5	4.2%

The calculated variance may differ from the financials due to the rounding factor.

### Orange fixed and Orange internet

Orange fixed services are the Group's largest business segment despite the opening of the market to competition and entry of new fixed broadband service providers, such as; fiber internet service.

Orange internet provides various services, such as; corporate internet leased lines, fixed internet service for residential and corporate, web-hosting, and ICT services.

In addition to regular fixed calling services, Orange fixed provides high-speed fiber internet services for residential and corporate through its fiber-optic network, which covers areas throughout the Kingdom with competitive prices and high quality.

### Revenues (Orange fixed) and (Orange internet)

Orange fixed and internet revenue decreased by 1.7% in 2022 compared to 2021 mainly due the drop in wholesale revenues despite the growth in retail broadband and business services revenues

### Mobile communication (Orange mobile)

The Group's mobile communication segment consists of the mobile communication products and services offered by Orange mobile, which was registered in September 1999, to build a new, highly advanced mobile communication network to serve the Kingdom. Orange mobile began commercial operations in September 2000 as the second provider of mobile services in Jordan.

### Revenues (Orange mobile)

Orange mobile witnessed an increase in revenues by 5.6%, compared to 2021. The increase was mainly due to the growth in voice, data, and equipment revenues.

### Renewable energy

Renewable energy operations started in 2019 following the production of electricity from the solar farms' project.

### Orange Money

Orange Money is a money transfer, payment, and financial services solution provided via an electronic account linked to an Orange mobile number.

### Revenues (Orange Money)

Orange Money revenues witnessed an increase in 2022, reaching JD 2.4 million, compared to JD 1.0 million in 2021.

**20. The contracts concluded by the company with a subsidiary, sister, and affiliated companies:**

There is a management agreement between Orange Jordan and Orange Group. Also, several agreements were signed between the company and its subsidiaries in daily, normal business conduct.

There are no contracts, projects, or engagements entered into by the company with the Chairman of the Board of Directors, members of the Board of Directors, the Chief Executive Officer, or any company employees or relatives thereof.

**21. The company's key contributions in the areas of environmental preservation and community service:**

**2022 Achievements: digital developments that empower everyone**

Orange Jordan, the responsible digital leader, moved ahead in its digital empowerment mission inside and outside the company, through strategic partnerships with various sectors, to continue offering the latest technologies, powered by its advanced infrastructure, with a social and economic impact extending across the kingdom.

**Digital solutions and innovation**

The year 2022 witnessed developments in several digital solutions:

- Signing an agreement with the Telecommunications Regulatory Commission (TRC) to prepare for the launch of 5G network and conducting the first pilot in Abdali and the Innovation Hub.
- Launching the Orange 5G lab, the first of its kind in Jordan.
- Signing an agreement with Egypt Telecom, connecting Iraq to Europe.
- Launching jood Orange app for an integrated digital experience.
- Renewing the telecoms services agreement with the Jordanian Armed Forces.
- Holding two events for enterprises, the first for the service sector and the second for banking.
- Launching campaigns for home internet solutions and end of the year.
- Signing an agreement with Roya Kids to offer content suitable for children.

**Quality and reliability**

The company's leading efforts were recognized, including:

- Recognition from the Crown Prince for its efforts in the national vaccination campaign.
- The Fastest Fixed Internet - Fiber in Jordan for the year 2022 certificate from SpeedChecker.
- Tier III Gold Certification of Operational Sustainability.
- GEEIS certificate for the second consecutive year.
- Two ISO certificates for "Occupational Safety and Health Administration" and "Environment".

### Orange Money mobile wallet

Orange Money had a remarkable impact by facilitating digital financial transactions and supporting financial inclusion in line with the Jordan Central Bank's vision, achieving many milestones such as:

- Obtaining users' trust and becoming the leading PSP in Jordan thanks to its reliability, safety, and number of financial transactions that continue to grow.
- The first mobile wallet to enter the metaverse through LivatVerse Platform.
- Signing various agreements with various institutions.

### Digital inclusion and education

Thousands of young men and women participated in Orange's free digital programs, especially under the "Innovation Space" project co-funded by the European Union (EU), and Orange Digital Center in partnership with the German Agency for International Cooperation (GIZ), universities and other entities:

### BIG by Orange and the AI Incubator

- Launching Season 9 of the Business Innovation Startups' Growth Platform (BIG) in partnership with the Information and Communications Technology Association of Jordan (int@j).
- Sponsoring the participation of 3 projects in the Jordanian Innovation, Tech & Entrepreneurship forum at Dubai Expo.
- Supporting 5 startups to attend VivaTech conference in Paris.
- The first cohort of Orange AI Incubator graduation and the second cohort onboarding.
- Supporting the Social Entrepreneurship Mapping project in Jordan.

### Coding Academies and School

- Expanding Orange Coding Academy program to Balqa, Zarqa, Irbid and Aqaba, to train more young men and women, with the employment rate reaching 80% of the graduates.
- Launching the Data Science Academy.
- Orange Coding Academy's employment rate reached 85% in Amman with the conclusion of third cohort.
- The Coding School trained more than 200 students between the ages of 9 and 17 on programming languages.

### Orange Digital Fabrication Lab

- Empowering 90 young men and women through the Mobile FabLab, in addition to the fourth cohort graduation at the Hashemite University and concluding its tour in Madaba.
- The graduation of the first cohort specialized in drones, launched this year, from the Orange FabLab.
- Establishing a FabLab at the Hashemite University and at the Orange Digital Villages in Irbid, Balqa, and Aqaba.

### Digital and social competitions

- Launching the Inspiring Change through Digital World award for women.
- Announcing the sixth local edition of the Orange Social Ventures Prize (OSVP).
- Sponsoring the "Deal with My Topic Objectively" media competition for persons with disabilities.
- Launching the first Orange Summer Challenge for university students and honoring the winners.
- Supporting 3 startups in the Towards Digital and Sustainable Media program.

### Youth, education, and entrepreneurship

- Launching Orange Coursat, a free online digital training platform.
- Launching The Studio at Orange Digital Village in Amman.
- Honoring Tawjiji top achievers nationwide, children of employees and journalists, and students with disabilities in partnership with the Higher Council for the Rights of Persons with Disabilities.
- Launching the giglancing program, that provided training for more than 1,000 young men and women.
- Expanding the reach of Orange's free programs with the inauguration of Orange Digital Village in Aqaba and Irbid, each comprising Coding Academy, FabLab and BIG.
- Supporting digital programs in Balqa in partnership with the Vocational Training Corporation and the EU.

### Universities

- Signing an agreement with the German Jordanian University to launch the Dual Studies Program.
- Inaugurating Orange Digital Center Club at the German Jordan University in partnership with GIZ.
- Providing scholarships for 5 more years for top bachelor's and master's students in Princess Sumaya University for Technology.
- Renewing the agreement with Yarmouk University to provide students with the needed skills.

### Supporting our community

We have a great responsibility towards our community. Moreover, we believe in our active role in the special occasions, events, and interesting experiences. Some of 2022's highlights include:

- Continuing the partnership with Jordan Basketball Federation.
- Participating in the Women on the Frontlines conference.
- Participating in Al Abdali's 76th Independence Day Celebration.
- Continuing support for the community through various campaigns and Ramadan charitable activities.
- Supporting the Clothes Bank's campaign for children's education.

### Becoming a green company

Preserving the environment remains one of Orange Jordan's priorities, with many initiatives including:

- Adopting circular economy, continued efforts to reduce CO2 emissions through the company's Solar Farms, and implementing practices to enhance energy efficiency and reduce consumption of resources.
- Implementing part of Orange Forest in Jerash, under the National Afforestation Project.
- Offering the platinum sponsorship for the Solid Waste Management competition during the Environment Week.

**Confirmation**

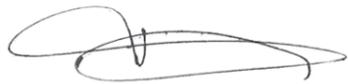

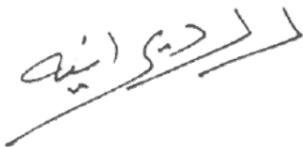

1. The Board of Directors confirms that there are no substantial matters which may affect the continuation of the company in the next fiscal year.
2. The Board of Directors confirms its responsibility for the preparation of the financial statements and the provision of an effective control system in the company.

- Corporate Governance Committee
- Risk Management Committee

### Members of the Audit Committee:

Members of the Audit Committee	Brief description of the qualifications and experiences related to financial and accounting matters	Number of meetings attended
Mrs. Dorothée Vignalou (Chairman of the Committee)	Mrs. Dorothée Vignalou is currently a member of the Board of Directors of Orange Jordan and the Deputy Chief Financial Officer of Orange Middle East and Africa. Prior to that, she was the Head of Central Controlling of Orange Business Services from Jan. 2014 – March 2018. She was the Head of Controlling Solutions and Referentials at Orange Group Finance from Sept. 2003 - Dec. 2013. She previously held the position of Consultant then Project Manager at France Telecom Finance Division from Sept. 1994 - Aug. 2003. Mrs. Vignalou graduated from Sciences Po Paris with a Master's degree in Economics & Finance Section in 1993.	4
Mr. Abdallah Abu Jamous	Mr. Abdallah Abu Jamous, is a member of the Board of Directors of Jordan Telecom Group - Orange since August 2017. Currently, he serves as an advisor to the Director General for Planning Affairs at the Social Security Corporation. He previously occupied the Strategic Planning Director post at the Social Security Corporation. And prior to that he held the position of the Director of Human Resources Department. Mr. Abdallah Abu Jamous holds a master's degree with honor in Management Information Systems from Al Balqa Applied University and a bachelor's degree in Accounting from Yarmouk University. Additionally, he earned several professional certificates, including Certified Internal Business Agility Assessor, Certified Project Management Professional Certification (PMP), Certified Risk Management Professional Certification (PMI - RMP) from the American Project Management Institute PMI, Certified Strategic Planner (CSP) from the American Accredited Consultants Institute, and Quality Assessment Certification (EFQM Assessor) from the European Organization for Quality Management. Mr. Abu Jamous was named as the Best Employee in the Hashemite Kingdom of Jordan for the year 2012 (The Best Employee Award issued from the Civil Service Bureau).	4
Mrs. Mireille El Helou	Mrs. Mireille El Helou has a globe-spanning history working in the ICT industry. She held different executive roles since joining the Orange Group in 2001, including Director of Sourcing and Supply Chain Transformation between 2007 and 2010, Director of Orange Middle East and Africa Sourcing & Supply Chain between 2010 and 2013, and Chief Business Market Officer and acting CEO of Orange Telkom Kenya between 2013 and 2016. From 2016 to 2019, as the General Manager of Orange Réunion & Mayotte, she led the telco operations with a team of more than 1000 employees, launching the best 4G network, accelerating the FTTH deployment and achieving network leadership, and spearheading the digital transformation. More recently, she was the CEO of Orange Silicon Valley in San Francisco, leading a multi-disciplinary team and scouting the US innovation ecosystem to inform the strategy and business of the Orange Group. Prior to joining Orange, Mireille worked in sales and marketing for almost a decade. She holds a Mechanical Engineering degree from the American University of Beirut. Mireille was appointed Senior Vice President of MENA and Safety at Orange Middle East and Africa on September 1, 2021, while overseeing governance and fostering cooperation across the region to create value. She is on the Board of Directors of Orange Jordan, Orange Egypt, and Orange Tunisia. Mrs. Mireille El Helou was replaced by Mr. Brelotte Ba as a member of Audit Committee on 26/10/2022	4
Mr. Brelotte Ba	Mr. Brelotte Ba a graduate of the Ecole Polytechnique and the Ecole Nationale des Ponts et Chaussées in Paris, Mr. Brelotte Ba joined the Orange Sonatel Group in 2001, where he successively held four positions as General Manager at Orange: in Guinea Bissau between 2008 and 2011, in Niger between 2012 and 2017, in Guinea between 2017 and 2018 and finally in Mali between 2018 and 2022. Building on this experience in Sub-Saharan Africa, in his last position as General Manager in Mali, Mr. Brelotte focused on accelerating the deployment of fixed and mobile broadband networks, which led to more than 90% of the Malian population now being covered by 4G, while simultaneously deploying fiber networks for FTTH offers. He also made digitalization a priority for Orange Mali, in particular by simplifying the customer experience for Orange Money, and for new diversification offers such as energy and IT services. In July 2021, the subsidiary began building a 25 MWp solar farm in collaboration with the Malian Electricity Company (EDM), which will make it the first remote self-production project in Sub-Saharan Africa. In 2021, Orange Mali experienced strong growth (11.4%) and these amazing achievements earned Mr. Brelotte the CEO of the Year award at AfricaCom 2021. On July 1, 2022, Mr. Brelotte Ba was appointed Deputy CEO of Orange Middle East and Africa, which has 18 subsidiaries and provides services to over 137 million customers.	4

## INDEPENDENT AUDITOR'S REPORT

AM/ 20268-002-003

To the Shareholders  
 Jordan Telecommunications Company  
 Amman - The Hashemite Kingdom of Jordan

### Report on the Audit of the Consolidated Financial Statements

#### Opinion

We have audited the consolidated financial statements of Jordan Telecommunications Company (the "Company"), and its subsidiaries (together the "Group") which comprise the consolidated statement of financial position as of December 31, 2022, and the consolidated statement of profit or loss and comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2022, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRSs").

#### Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ("IESBA Code") together with the other ethical requirements that are relevant to our audit of the Group's consolidated financial statements in the Kingdom of Jordan, and we have fulfilled our other ethical responsibilities. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### Key audit matters

##### Revenue recognition and related IT systems

The Group reported revenue of JD 347 million for the year 2022 (2021: JD 333 million) from telecommunication and related activities.

There is an inherent risk around telecom services revenue recognition because of the complexity of the related Information Technology ("IT") environment, the processing of large volumes of data through a number of different IT systems and the combination of different products and prices.

Due to the complexities and dependencies on different IT systems in the revenue recognition process and presumed fraud risk around the occurrence of revenue recorded we have considered this as a key audit matter.

The Group's accounting policies relating to revenue recognition are presented in note 3 and details about the Group's revenue are disclosed in notes 5 and 23 to the consolidated financial statements.

#### How our audit addressed the key audit matters

Our audit approach included a combination of test of controls and substantive procedures which included, inter alia, the following:

- Obtaining an understanding of the significant revenue processes including performance of an end to end walkthrough of the revenue process and identifying the relevant controls (including IT systems, interfaces and reports related to billing and revenue process);
- Evaluating the design and testing the implementation and operating effectiveness of the relevant controls;
- Involving our IT specialist to test IT general controls, covering pervasive IT risks around access security, change management and network operations;
- Performing data analysis and substantive analytical procedures of significant revenue streams; and
- Reviewing significant new bundles and regulatory pronouncements, the accounting treatments adopted and testing the related revenues recognised during the year;
- Assessing the disclosures in the financial statements relating to revenue against the requirements of IFRSs.

## Capitalisation and useful economic life of property and equipment and intangible assets

The Group has property, and equipment and intangible assets with a carrying amount of JD 478 million (2021: JD 442 million) with total additions of JD 107 Million during 2022 (2021: JD 67 Million).

The useful life of the property and equipment and intangible assets is based on management's technical assessment of factors, which requires judgement to be applied, and accordingly contains significant estimation uncertainty. The useful life of PPE and intangible assets has a direct impact on the amount of depreciation/amortisation charged to consolidated profit or loss. Consequently, we considered this to be a key audit matter.

In making its assessment of the asset's useful life, management has assessed the useful life of the PPE and intangible assets considering various factors such as utilisation period, maintenance programs and normal wear and tear.

The accounting policy for property and equipment and intangible assets is set out in note 3 and the related disclosures are set out in note 6 and note 7 to the consolidated financial statements.

Our audit procedures included , but were not limited to, the following:

- Understanding the business processes for determining the useful life of property and equipment and intangible assets and the recording of additions.
- Evaluating the controls around the estimation of useful life of the property and equipment and intangible assets and the controls over the additions process to determine if they had been appropriately designed and implemented;
- We evaluated the capitalization policies against the requirements of IFRSs and normal practice in the telecommunications industry.
- We tested the material additions during the year through assessing the nature of costs incurred and testing the amounts recorded and assessing whether the description of the expenditure met the capitalization criteria contained within IFRSs.
- We assessed the overall presentation, structure and content of the related disclosures of property and equipment and intangible assets against the requirements of IFRSs

## Other Matters

The accompanying consolidated financial statements are a translation of the original consolidated financial statements which are in Arabic language, to which reference should be made.

## Other Information

Management is responsible for the other information. The other information comprises the information included in the annual report but does not include the consolidated financial statements and our auditor's report thereon. The annual report is expected to be made available to us after the date of this auditor's report. Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance

## Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

## Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

#### Report on Other Legal and Regulatory Requirements

The Group maintains proper accounting records duly organized and in line with the accompanying consolidated financial statements. We recommend that the General Assembly of Shareholders approve these consolidated financial statements.

**JORDAN TELECOMMUNICATIONS COMPANY  
(PUBLIC SHAREHOLDING COMPANY)  
AMMAN – THE HASHEMITE KINGDOM OF JORDAN  
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

**1. General Information**

Jordan Telecommunications Company (the "Company") was established as a Public Shareholding Company on October 8, 1996, and adopted the Orange brand in 2007. The Company's authorized and paid in capital amounted to JD 187,500,000 divided into 187,500,000 shares. The consolidated financial statements comprise the Company and its subsidiaries (collectively referred to as the "Group").

The principal activities of the Group comprise introduction of a variety of telecommunication, internet, data and mobile payment services. These services include among other services fixed line services, prepaid, and postpaid mobile services, ADSL, fiber optics internet services, mobile payment services and establishing non-profitable academic centers and initiatives.

The Company is 51% owned by The Joint Investments Telecommunications Company (JIT CO.) a fully owned subsidiary of Orange Group (France). Moreover, Jordanian Social Security Corporation and Noor Financial Investment own 28.88% and 5.55% of the Company's issued shares, respectively.

The Group's head offices are located in Abdali, the Boulevard, Amman - Jordan.

The consolidated financial statements were approved by the Board of Directors on February 2, 2023.

**2. Basis of Preparation**

**Statement of compliance**

The consolidated financial statements of the Group have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

**Basis of measurement**

The consolidated financial statements have been prepared on a historical cost basis.

**Functional and presentation currency**

The consolidated financial statements are presented in Jordanian Dinars which represents the functional currency of the Group.

**Going concern**

The directors have, at the time of approving the consolidated financial statements, a reasonable expectation that the Group have adequate resources to continue in operational existence for the foreseeable future. Thus they continue to adopt the going concern basis of accounting in preparing the consolidated financial statements.

**3 Significant Accounting Policies**

The same accounting policies, presentation and methods of computation have been followed in these consolidated financial statements as were applied in the preparation of the Company's consolidated financial statements for the year ended December 31, 2021, except for the effect of what is stated in noted (3.1.a).

**3.1 Adoption of new and revised Standards**

**a. New and amended IFRS Standards that are effective for the current year**

The following new and revised IFRSs, which became effective for annual periods beginning on or after January 1, 2022, have been adopted in these consolidated financial statements. The application of these revised IFRSs has not had any material impact on the amounts reported for the current and prior years but may affect the accounting for future transactions or arrangements.

**Amendments to IFRS 3 Business Combinations – Reference to the Conceptual Framework**

The amendments update IFRS 3 so that it refers to the 2018 Conceptual Framework instead of the 1989 Framework. They also add to IFRS 3 a requirement that, for obligations within the scope of IAS 37, an acquirer applies IAS 37 to determine whether at the acquisition date a present obligation exists as a result of past events. For a levy that would be within the scope of IFRIC 21 Levies, the acquirer applies IFRIC 21 to determine whether the obligating event that gives rise to a liability to pay the levy has occurred by the acquisition date.

### Amendments to IAS 16 – Property, Plant and Equipment—Proceeds before Intended Use

The amendments prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced before that asset is available for use, i.e. proceeds while bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Consequently, an entity recognises such sales proceeds and related costs in profit or loss. The entity measures the cost of those items in accordance with IAS 2 Inventories.

The amendments also clarify the meaning of 'testing whether an asset is functioning properly'. IAS 16 now specifies this as assessing whether the technical and physical performance of the asset is such that it is capable of being used in the production or supply of goods or services, for rental to others, or for administrative purposes.

If not presented separately in the statement of comprehensive income, the financial statements shall disclose the amounts of proceeds and cost included in profit or loss that relate to items produced that are not an output of the entity's ordinary activities, and which line item(s) in the statement of comprehensive income include(s) such proceeds and cost.

### Amendments to IAS 37 – Onerous Contracts—Cost of Fulfilling a Contract

The amendments specify that the 'cost of fulfilling' a contract comprises the 'costs that relate directly to the contract'. Costs that relate directly to a contract consist of both the incremental costs of fulfilling that contract (examples would be direct labour or materials) and an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling the contract).

### Annual Improvements to IFRS Standards 2018-2020

The Annual Improvements include amendments to four standards:

#### Amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards

The amendment provides additional relief to a subsidiary which becomes a first-time adopter later than its parent in respect of accounting for cumulative translation differences. As a result of the amendment, a subsidiary that uses the exemption in IFRS 1:D16 (a) can now also elect to measure cumulative translation differences for all foreign operations at the carrying amount that would be included in the parent's financial statements, based on the parent's date of transition to IFRS Standards, if no adjustments were made for procedures and for the effects of the business combination in which the parent acquired the subsidiary. A similar election is available to an associate or joint venture that uses the exemption in IFRS 1:D16 (a).

#### IFRS 9 Financial Instruments

The amendment clarifies that in applying the '10 per cent' test to assess whether to derecognise a financial liability, an entity includes only fees paid or received between the entity (the borrower) and the lender, including fees paid or received by either the entity or the lender on the other's behalf.

#### IFRS 16 Leases

The amendment removes the illustration of the reimbursement of leasehold improvements.

#### IAS 41 Agriculture

The amendment removes the requirement in IAS 41 for entities to exclude cash flows for taxation when measuring fair value. This aligns the fair value measurement in IAS 41 with the requirements of IFRS 13 Fair Value Measurement to use internally consistent cash flows and discount rates and enables preparers to determine whether to use pretax or post-tax cash flows and discount rates for the most appropriate fair value measurement.

### b. New and Revised Standards in issue but not yet effective

At the date of authorization of these consolidated financial statements, the Group has not applied the following new and revised IFRS Standards that have been issued but are not yet effective:

New and revised IFRSs	Effective date
<p><b>IFRS 17 Insurance Contracts (including the June 2020 amendments to IFRS 17)</b></p> <p>IFRS 17 establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts and supersedes IFRS 4 Insurance Contracts.</p> <p>IFRS 17 outlines a general model, which is modified for insurance contracts with direct participation features, described as the variable fee approach. The general model is simplified if certain criteria are met by measuring the liability for remaining coverage using the premium allocation approach.</p> <p>The general model uses current assumptions to estimate the amount, timing and uncertainty of future cash flows and it explicitly measures the cost of that uncertainty. It takes into account market interest rates and the impact of policyholders' options and guarantees.</p> <p>In June 2020, the Board issued Amendments to IFRS 17 to address concerns and implementation challenges that were identified after IFRS 17 was published. The amendments defer the date of initial application of IFRS 17 (incorporating the amendments) to annual reporting periods beginning on or after January 1, 2023. At the same time, the Board issued Extension of the Temporary Exemption from Applying IFRS 9 (Amendments to IFRS 4) that extends the fixed expiry date of the temporary exemption from applying IFRS 9 in IFRS 4 to annual reporting periods beginning on or after January 1, 2023.</p> <p>In December 2021, the IASB issued Initial Application of IFRS 17 and IFRS 9—Comparative Information (Amendment to IFRS 17) to address implementation challenges that were identified after IFRS 17 was published. The amendment addresses challenges in the presentation of comparative information.</p> <p>For the purpose of the transition requirements, the date of initial application is the start of the annual reporting period in which the entity first applies the Standard, and the transition date is the beginning of the period immediately preceding the date of initial application.</p>	<p>The amendments are applied retrospectively for annual periods beginning on or after January 1, 2023, unless impracticable, in which case the modified retrospective approach or the fair value approach is applied.</p>
<p><b>Amendments to IFRS 10 and IAS 28 - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture</b></p> <p>The amendments to IFRS 10 and IAS 28 deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. Specifically, the amendments state that gains or losses resulting from the loss of control of a subsidiary that does not contain a business in a transaction with an associate or a joint venture that is accounted for using the equity method, are recognised in the parent's profit or loss only to the extent of the unrelated investors' interests in that associate or joint venture. Similarly, gains and losses resulting from the remeasurement of investments retained in any former subsidiary (that has become an associate or a joint venture that is accounted for using the equity method) to fair value are recognised in the former parent's profit or loss only to the extent of the unrelated investors' interests in the new associate or joint venture.</p>	<p>The effective date is yet to be set. Earlier application is permitted.</p>
<p><b>Amendments to IAS 1 Presentation of Financial Statements – Classification of Liabilities as Current or Non-current</b></p> <p>The amendments to IAS 1 affect only the presentation of liabilities as current or non-current in the statement of financial position and not the amount or timing of recognition of any asset, liability, income or expenses, or the information disclosed about those items.</p> <p>The amendments clarify that the classification of liabilities as current or noncurrent is based on rights that are in existence at the end of the reporting period, specify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability, explain that rights are in existence if covenants are complied with at the end of the reporting period, and introduce a definition of 'settlement' to make clear that settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services.</p>	<p>The amendments are applied retrospectively for annual periods beginning on or after January 1, 2023, with early application permitted.</p>

New and revised IFRSs	Effective date
<p><b>Amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 Making Materiality Judgements - Disclosure of Accounting Policies</b></p> <p>The amendments change the requirements in IAS 1 with regard to disclosure of accounting policies. The amendments replace all instances of the term 'significant accounting policies' with 'material accounting policy information'. Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements.</p> <p>The supporting paragraphs in IAS 1 are also amended to clarify that accounting policy information that relates to immaterial transactions, other events or conditions is immaterial and need not be disclosed. Accounting policy information may be material because of the nature of the related transactions, other events or conditions, even if the amounts are immaterial. However, not all accounting policy information relating to material transactions, other events or conditions is itself material.</p> <p>The Board has also developed guidance and examples to explain and demonstrate the application of the 'four-step materiality process' described in IFRS Practice Statement 2.</p>	<p>January 1, 2023, with earlier application permitted and are applied prospectively.</p> <p>The amendments to IFRS Practice Statement 2 do not contain an effective date or transition requirements.</p>
<p><b>Amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors - Definition of Accounting Estimates</b></p> <p>The amendments replace the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty".</p> <p>The definition of a change in accounting estimates was deleted. However, the Board retained the concept of changes in accounting estimates in the Standard with the following clarifications:</p> <ul style="list-style-type: none"> <li>• A change in accounting estimate that results from new information or new developments is not the correction of an error</li> <li>• The effects of a change in an input or a measurement technique used to develop an accounting estimate are changes in accounting estimates if they do not result from the correction of prior period errors</li> </ul> <p>The IASB added two examples (Examples 4-5) to the Guidance on implementing IAS 8, which accompanies the Standard. The IASB has deleted one example (Example 3) as it could cause confusion in light of the amendments.</p>	<p>January 1, 2023, with earlier application permitted.</p>

New and revised IFRSs	Effective date
<p><b>Amendments to IAS 12 Income Taxes - Deferred Tax related to Assets and Liabilities arising from a Single Transaction</b></p> <p>The amendments introduce a further exception from the initial recognition exemption. Under the amendments, an entity does not apply the initial recognition exemption for transactions that give rise to equal taxable and deductible temporary differences.</p> <p>Depending on the applicable tax law, equal taxable and deductible temporary differences may arise on initial recognition of an asset and liability in a transaction that is not a business combination and affects neither accounting nor taxable profit. For example, this may arise upon recognition of a lease liability and the corresponding right-of-use asset applying IFRS 16 at the commencement date of a lease.</p> <p>Following the amendments to IAS 12, an entity is required to recognise the related deferred tax asset and liability, with the recognition of any deferred tax asset being subject to the recoverability criteria in IAS 12.</p> <p>The Board also adds an illustrative example to IAS 12 that explains how the amendments are applied.</p> <p>The amendments apply to transactions that occur on or after the beginning of the earliest comparative period presented. In addition, at the beginning of the earliest comparative period an entity recognises:</p> <ul style="list-style-type: none"> <li>• A deferred tax asset (to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised) and a deferred tax liability for all deductible and taxable temporary differences associated with: <ul style="list-style-type: none"> <li>- Right-of-use assets and lease liabilities.</li> <li>- Decommissioning, restoration and similar liabilities and the corresponding amounts recognised as part of the cost of the related asset.</li> </ul> </li> <li>• The cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings (or other component of equity, as appropriate) at that date.</li> </ul>	<p>January 1, 2023, with earlier application permitted.</p>

Management anticipates that these new standards, interpretations and amendments will be adopted in the Group's consolidated financial statements as and when they are applicable and adoption of these new standards, interpretations and amendments, may have no material impact on the consolidated financial statements of the Group in the period of initial application.

### 3.2 Summary of Significant Accounting Policies

#### Basis of Consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries) made up to December 31, each year. Control is achieved when the Company:

- Has the power over the investee.
- Is exposed, or has rights, to variable returns from its involvement with the investee.
- Has the ability to use its power to affect its returns.

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Company has less than a majority of the voting rights of an investee, it considers that it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:

- The size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders.
- Potential voting rights held by the Company, other vote holders or other parties.
- Rights arising from other contractual arrangements.
- Any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, the results of subsidiaries acquired or disposed of during the year are included in profit or loss from the date the Company gains control until the date when the Company ceases to control the subsidiary.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used into line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between the members of the Group are eliminated on consolidation.

Non-controlling interests in subsidiaries are identified separately from the Group's equity therein. Those interests of non-controlling shareholders that are present ownership interests entitling their holders to a proportionate share of net assets upon liquidation may initially be measured at fair value or at the non-controlling interests' proportionate share of the fair value of the acquiree's identifiable net assets. The choice of measurement is made on an acquisition-by-acquisition basis. Other non-controlling interests are initially measured at fair value. Subsequent to acquisition, the carrying amount of non-controlling interests is the amount of those interests at initial recognition plus the non-controlling interests' share of subsequent changes in equity.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of the subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in the Group's interests in subsidiaries that do not result in a loss of control are accounted for as equity transactions. The carrying amount of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the noncontrolling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to the owners of the Company.

When the Group loses control of a subsidiary, the gain or loss on disposal recognised in profit or loss is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), less liabilities of the subsidiary and any non-controlling interests. All amounts previously recognised in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as required/ permitted by applicable IFRS Standards). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under IFRS 9 when applicable, or the cost on initial recognition of an investment in an associate or a joint venture.

The subsidiaries of the Group, included in the consolidated financial statements of Jordan Telecommunications Company which are all incorporated in Jordan are as follows:

Name of subsidiary	Principal activity	Capital JD	Shareholding percentage %
Petra Jordanian Mobile Telecommunications	GSM Operator	70,000,000	100%
Jordan Data Communications	Internet service provider (ISP)	750,000	100%
Dimension Company for Digital Development of Data	Development of Renewable Energy Projects	220,000	*100%
Petra Mobile Payment Services Company	Electronic Payment Services through Mobile Phone	***5,000,000	**100%
Future Pioneers for Development and Initiatives	Orange Foundation	15,000	**100%

\* Jordan Telecommunications owned 51% from Dimension Company for Digital Development of Data and the remaining 49% is owned by Petra Jordanian Mobile Telecommunications Company (wholly owned subsidiary).

\*\* Wholly owned subsidiaries of Petra Jordanian Mobile Telecommunications.

\*\*\* The capital has been increased by JD 3 million to reach JD 5 million during December 2022, however, the registration of the new capital has finalized at Ministry of Industry and Trade during January 2023.

#### Financial instruments

Financial assets and financial liabilities are recognised in the Group's consolidated statement of financial position when the Group becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in the consolidated statement of profit or loss.

#### Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are measured subsequently in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

#### Classification of financial assets

##### Debt instruments designated at amortised cost

Debt instruments that meet the following conditions are measured subsequently at amortised cost:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

### Amortised cost and effective interest rate method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period.

For financial instruments other than purchased or originated credit-impaired financial assets (i.e. assets that are credit-impaired on initial recognition), the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses, through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated by discounting the estimated future cash flows, including expected credit losses, to the amortised cost of the debt instrument on initial recognition.

The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance.

Interest income is recognised using the effective interest method for debt instruments measured subsequently at amortised cost and at FVTOCI. For financial instruments other than purchased or originated credit-impaired financial assets, interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset. If, in subsequent reporting periods, the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset.

For purchased or originated credit-impaired financial assets, the Group recognises interest income by applying the credit-adjusted effective interest rate to the amortised cost of the financial asset from initial recognition. The calculation does not revert to the gross basis even if the credit risk of the financial asset subsequently improves so that the financial asset is no longer credit-impaired.

Interest income is recognised in consolidated statement of profit or loss.

### Equity instruments designated as at FVTOCI

On initial recognition, the Group may make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognised by an acquirer in a business combination.

Investments in equity instruments at FVTOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the investments revaluation reserve. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, instead, they will be transferred to retained earnings.

Dividends on these investments in equity instruments are recognised in profit or loss in accordance with IFRS 9, unless the dividends clearly represent a recovery of part of the cost of the investment.

### Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI are measured at FVTPL. Specifically:

- Investments in equity instruments are classified as at FVTPL, unless the Group designates an equity investment that is neither held for trading nor a contingent consideration arising from a business combination as at FVTOCI on initial recognition.
- Debt instruments that do not meet the amortised cost criteria or the FVTOCI criteria are classified as at FVTPL. In addition, debt instruments that meet either the amortised cost criteria or the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency ('accounting mismatch') that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Group has not designated any debt instruments as at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss.

### Foreign exchange gains and losses

The carrying amount of financial assets that are denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period. Specifically:

- For financial assets measured at amortised cost that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss.
- For debt instruments measured at FVTOCI that are not part of a designated hedging relationship, exchange differences on the amortised cost of the debt instrument are recognised in profit or loss. As the foreign currency element recognised in profit or loss is the same as if it was measured at amortised cost, the residual foreign currency element based on the translation of the carrying amount (at fair value) is recognised in other comprehensive income in the investments revaluation reserve.
- For financial assets measured at FVTPL that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss as part of the fair value gain or loss.
- For equity instruments measured at FVTOCI, exchange differences are recognised in other comprehensive income in the investments revaluation reserve.

### Impairment of financial assets

The Group recognises a loss allowance for expected credit losses on investments in debt instruments that are measured at amortised cost or at FVTOCI, trade receivables, contract assets, as well as on financial guarantee contracts. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

The Group always recognises lifetime ECL for trade receivables and contract assets. The expected credit losses on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

For all other financial instruments, the Group recognises lifetime ECL when there has been a significant increase in credit risk since initial recognition. However, if the credit risk on the financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition instead of on evidence of a financial asset being credit-impaired at the reporting date.

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

### Significant increase in credit risk

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

The Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date. A financial instrument is determined to have low credit risk if:

- The financial instrument has a low risk of default,
- The borrower has a strong capacity to meet its contractual cash flow obligations in the near term, and
- Adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

For financial guarantee contracts, the date that the Group becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing the financial instrument for impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of a financial guarantee contracts, the Group considers the changes in the risk that the specified debtor will default on the contract.

The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

### Definition of default

The Group considers a financial asset to be in default when the customer is unlikely to pay its credit obligations to the Group in full, there is sufficient doubt about the ultimate collectability; or the customer is past due for more than 90 days.

### Credit-impaired financial assets

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- significant financial difficulty of the issuer or the borrower;
- a breach of contract, such as a default or past due event;
- the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for that financial asset because of financial difficulties.

### Write-off policy

The Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

### Measurement and recognition of expected credit losses

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above. As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date; for financial guarantee contracts, the exposure includes the amount drawn down as at the reporting date, together with any additional amounts expected to be drawn down in the future by default date determined based on historical trend, the Group's understanding of the specific future financing needs of the debtors, and other relevant forward-looking information.

For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the Group expects to receive, discounted at the original effective interest rate.

For a financial guarantee contract, as the Group is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed, the expected loss allowance is the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the Group expects to receive from the holder, the debtor or any other party.

The Group recognises an impairment gain or loss in consolidated statement of profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

### Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss. In addition, on derecognition of an investment in a debt instrument classified as at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss. In contrast, on derecognition of an investment in equity instrument which the Group has elected on initial recognition to measure at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is not reclassified to profit or loss, but is transferred to retained earnings.

### Financial liabilities and equity

#### Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

#### Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

#### Financial liabilities

All financial liabilities are measured subsequently at amortised cost using the effective interest method or at FVTPL.

#### Financial liabilities at FVTPL

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on changes in fair value recognised in the consolidated statement of profit or loss to the extent that they are not part of a designated hedging relationship. The net gain or loss recognised in the consolidated statement profit or loss incorporates any interest paid on the financial liability.

#### Financial liabilities measured subsequently at amortised cost

Financial liabilities that are not (i) contingent consideration of an acquirer in a business combination, (ii) held-for trading, or (iii) designated as at FVTPL, are measured subsequently at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

### Financial guarantee contract liabilities

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

Financial guarantee contract liabilities are measured initially at their fair values and, if not designated as at FVTPL and do not arise from a transfer of an asset, are measured subsequently at the higher of:

- The amount of the loss allowance determined in accordance with IFRS 9 (see financial assets above).
- The amount recognised initially less, where appropriate, cumulative amortisation recognised in accordance with the revenue recognition policies.

### Foreign exchange gains and losses

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments. These foreign exchange gains and losses are recognised in profit or loss for financial liabilities that are not part of a designated hedging relationship. For those which are designated as a hedging instrument for a hedge of foreign currency risk foreign exchange gains and losses are recognised in other comprehensive income and accumulated in a separate component of equity.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss for financial liabilities that are not part of a designated hedging relationship.

### Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

### Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and reported on a net basis in the accompanying consolidated statement of financial position when a legally enforceable right to set off such amounts exists and when the Group intends to settle on a net basis or to realise the assets and settle the liabilities simultaneously.

### Dividend

Dividend distributions to the Group's shareholders are recognized as a liability in the consolidated financial statements in the period in which the dividend are approved by the shareholders. Dividend for the year that are approved after the reporting date of the consolidated financial statements are considered as an event after the reporting date.

### Earnings per share

The Group presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the parent by the weighted average number of ordinary shares outstanding during the year. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares, which comprise convertible notes and share options granted to employees, if any.

### Property and equipment

#### Recognition and measurement

Property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Assets in the course of construction are carried at cost, less any impairment.

Cost includes expenditure that is directly attributable to the acquisition of the asset. The costs of self-constructed assets include the following:

- The cost of materials and direct labour;
- Any other costs directly attributable to bringing the assets to a working condition for their intended use;
- When the Group has an obligation to remove the asset or restore the site, an estimate of the costs of dismantling and removing the items and restoring the site on which they are located; and
- Capitalized borrowing costs.

Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of property and equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

Capital work-in-progress is transferred to the related property and equipment when the construction or installation and related activities necessary to prepare the property and equipment for their intended use have been completed, and the property and equipment are ready for operational use.

#### Expenditure

Expenditure incurred to replace a component of an item of property and equipment that is accounted for separately is capitalised and the carrying amount of the component that is replaced is written off. Other subsequent expenditure is capitalised only when it increases future economic benefits of the related item of property and equipment. All other expenditure is recognised in the consolidated statement of profit or loss as incurred.

#### Depreciation

Depreciation is recognised so as to write off the cost (other than freehold land and properties under construction) over their useful lives, using the straight-line method (generally with no residual value deducted), on the following bases:

	Years
Buildings	25
Telecommunications equipment	5-20
Other assets	2-7

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Right-of-use assets are depreciated over the shorter period of the lease term and the useful life of the underlying asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Group expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset.

#### Derecognition

An item of property and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. The gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

## Intangible assets

### Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives which as follows:

	Years
FLAG access rights	20
Mobile operating licenses and frequency rights	25
Other intangibles	4-25

The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses. The Group has no intangibles with indefinite useful lives.

### Internally-generated intangible assets – research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following conditions have been demonstrated:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale.
- The intention to complete the intangible asset and use or sell it.
- The ability to use or sell the intangible asset.
- How the intangible asset will generate probable future economic benefits.
- The availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset.
- The ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

### Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

## Leases

### The Group as lessee

The Group assesses whether a contract is, or contains, a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets (such as tablets and personal computers, small items of office furniture and telephones). For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Group uses its incremental borrowing rate.

The incremental borrowing rate depends on the term, currency and start date of the lease and is determined based on a series of inputs including: the risk-free rate based on government bond rates; a country-specific risk adjustment; a credit risk adjustment based on bond yields; and an entity-specific adjustment when the risk profile of the entity that enters into the lease is different to that of the Group and the lease does not benefit from a guarantee from the Group.

Lease payments included in the measurement of the lease liability comprise :

- Fixed lease payments (including in-substance fixed payments), less any lease incentives receivable.
- Variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date.
- The amount expected to be payable by the lessee under residual value guarantees.
- The exercise price of purchase options, if the lessee is reasonably certain to exercise the options.
- Payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease.

The lease liability is presented as a separate line in the consolidated statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

The Group remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

- The lease term has changed or there is a significant event or change in circumstances resulting in a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- The lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).
- A lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

The Group did not make any such adjustments during the periods presented.

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day, less any lease incentives received and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Whenever the Group incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognised and measured under IAS 37. To the extent that the costs relate to a right-of-use asset, the costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the right-of-use asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Group expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The right-of-use assets are presented as a separate line in the consolidated statement of financial position.

The Group applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss.

Variable rents that do not depend on an index or rate are not included in the measurement the lease liability and the right-of-use asset. The related payments are recognised as an expense in the period in which the event or condition that triggers those payments occurs and are included in profit or loss.

As a practical expedient, IFRS 16 permits a lessee not to separate non-lease components, and instead account for any lease and associated non-lease components as a single arrangement. The Group has not used this practical expedient. For contracts that contain a lease component and one or more additional lease or non-lease components, the Group allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

#### The Group as lessor

Leases for which the Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

Amounts due from lessees under finance leases are recognised as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

Subsequent to initial recognition, the Group regularly reviews the estimated unguaranteed residual value and applies the impairment requirements of IFRS 9, recognising an allowance for expected credit losses on the lease receivables.

When a contract includes both lease and non-lease components, the Group applies IFRS 15 to allocate the consideration under the contract to each component.

#### Impairment of property and equipment, right-of-use of assets and intangible assets

At each reporting date, the Group reviews the carrying amounts of its property and equipment, right-of-use of assets and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with an indefinite useful life are tested for impairment at least annually and whenever there is an indication at the end of a reporting period that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss to the extent that it eliminates the impairment loss which has been recognised for the asset in prior years.

## Taxation

The income tax expense represents the sum of the tax currently payable and deferred tax.

#### Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

A provision is recognised for those matters for which the tax determination is uncertain but it is considered probable that there will be a future outflow of funds to a tax authority. The provisions are measured at the best estimate of the amount expected to become payable. The assessment is based on the judgement of tax professionals within the Group supported by previous experience in respect of such activities and in certain cases based on specialist independent tax advice.

#### Deferred tax

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, a deferred tax liability is not recognised if the temporary difference arises from the initial recognition of goodwill.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised based on tax laws and rates that have been enacted or substantively enacted at the reporting date.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

#### Current tax and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

## Inventories

Inventories are stated at the lower of cost and net realisable value.

Cost comprises direct materials and, where applicable, other costs that have been incurred in bringing the inventories to their present location and condition. Cost is calculated using the weighted average cost method.

Net realisable value represents the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.

## Employees' end of service benefits

The Group provides end of service benefits for its employees who have chosen the option to accumulate the end of service benefits starting from January 1, 2012. The entitlement to these benefits is based upon the employees' final salary and length of service, subject to the completion of a minimum service period in accordance with the Group's internal policies. A provision is made for the full amount of end of service benefit for the period of service up to the end of the year. The provision is disclosed as both current and non-current liability.

## Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle that obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

## Revenue recognition

Most of the Group's revenue falls within the application scope of IFRS 15 "Revenue from contracts with customers". The Group's products and services are offered to customers under service contracts only and contracts combining the equipment used to access services and/or other service offerings. Revenue is recognized net of taxes collected on behalf of government.

Revenues from contracts with customers is recognized when control of the goods or services is transferred to the customer at an amount that reflects the considerations to which the Group expects to be entitled in exchange for those goods and services. The Group has generally concluded that it is the principal in its revenue arrangements.

### Standalone service offerings (mobile service only, fixed service only, convergent service)

The Group proposes to individual consumers and corporate/enterprise customers a range of fixed and mobile telephone services, fixed, mobile and ADSL internet access services and content offerings (Media, added-value audio service, etc.). Certain contracts are for a fixed term (ranges between 12 to 36 months), while others may be terminated at short notice (i.e. monthly arrangements or portions of services).

Service revenue is recognized when the service is rendered, based on use (e.g. minutes of traffic) or the period (e.g. monthly service costs).

Under certain content offerings, the Group may act solely as an agent enabling the supply by a third-party of goods or services to the customer and not as a principal in the supply of the content. In such cases, revenue is recognized net of amounts transferred to the third-party.

Contracts with customers generally do not include a material right, as the price invoiced for contracts and the services purchased and consumed by the customer beyond the firm scope (e.g. additional consumption, options, etc.) generally reflect their standalone selling prices. The Group has no significant impact related to contract modification for this type of contract. Service obligations transferred to the customer at the same pace are treated as a single obligation.

When contracts include contractual clauses covering commercial discounts (initial discount on signature of the contract or conditional on attaining a consumption threshold) or free offers (e.g. 3 free months), the Groups defers these discounts or free offers over the enforceable contract term (period during which the Group and the customer have a firm commitment). Where applicable, the consideration payable to the customer is recognized as a deduction from revenue in accordance with the specific terms and conditions of each contract.

If the performance obligations are not classified as distinct, the offering revenue is recognized on a straight-line over the contract term. The initial service connection in the context of a service contract and communication offering, is a good example. It is not generally separable from the service contract and communication offering and is therefore recognized in income over the average term of the expected contractual relationship.

### Separate equipment sales

The Group proposes to individual consumers and corporate/enterprise customers several ways to buy their equipment (primarily mobile phones): equipment sales may be separate from or bundled with a service offering. When separate from a service offering, the amount invoiced is recognized in revenue on delivery and receivable immediately. Where payment is received in instalments, the offering comprises a financial component and interest is calculated and deducted from the amount invoiced and recognized over the payment period in finance income.

### Bundled equipment and service offerings

The Group proposes numerous offerings to its individual consumers and corporate/enterprise customers comprising equipment (e.g. a mobile terminal) and services (e.g. a communications contract).

Equipment revenue is recognized separately if the two components are distinct (i.e. if the customer can receive the services separately). Where one of the components in the offering is not at its separate selling price, revenue is allocated to each component in proportion to their individual selling prices. This is notably the case in offerings combining the sale of a mobile phone at a reduced price, where the individual selling price of the mobile phone is considered equal to its selling price on the sale date based on market practice.

### Services including a build and run phase

Certain corporate/enterprise customers contracts include two phases: a build phase followed by the management of the IT platforms.

Revenue recognition requires an analysis of the facts and circumstances of each contract in order to determine whether distinct performance obligations exist. Depending on the contract, the Group recognizes build phase revenue at completion if this phase is qualified as distinct. On each contract modification, the Group assess the scope modification or its impact on the contract price in order to determine whether the amendment must be treated as a distinct contract, as if the existing contract were terminated and a new contract signed, or whether the amendment must be considered as a change to the existing contract.

### Service offerings to carriers (wholesale)

Three types of commercial agreement are entered into with wholesale customers (e.g. other telecommunication operators) for domestic wholesale activities and International carrier offerings:

Pay-as-you-go model: contract generally applied to "legacy" regulated activities (bitstream call termination, access to the local loop, roaming and certain data solution contracts), where contract services are not covered by a firm volume commitment. Revenue is recognized as the services are rendered (which corresponds to transfer of control) over the contractual term;

Send-or-pay model: contract where the price, volume and term are defined. The customer has a commitment to pay the amount indicated in the contract irrespective of actual traffic consumed over the commitment period. This contract category notably includes certain MVNO, IDD and hubbing contracts. Revenue is recognized progressively based on actual traffic during the period, to reflect transfer of control to the customer.

Agreements between major transit carriers are not billed (free peering) and therefore not recognized in revenue.

#### Service level commitment clause

The Group's commercial arrangements incorporate service level commitments (delivery time, service reinstatement time).

These service level agreements cover commitments provided by the Group under the order, delivery, and after sales services process. If the Group fails to comply with one of these commitments, then it pays compensation to the end-customer, which is usually a tariff reduction deducted from revenues. The expected amount of such penalties is deducted from revenue as soon as it is probable that the commitment has not been or will not be met.

#### Value added services - Principal vs. agent

Revenue from value added services (VAS) sharing arrangements depend on the analysis of the facts and circumstances surrounding these transactions. Revenue from VAS is recognized when the Group performs the related service and, depending on the Group's control or lack of control on the services transferred to the customer, is recognized either at the gross amount billed to the customer or the amount receivable by the Group as commission for facilitating the service.

#### Significant financing component

If a customer can pay for purchased equipment or services over a period, IFRS 15 requires judgement to determine if the contract includes a significant financing component. If it does, then the transaction price is adjusted to reflect the time value of money.

#### Customer loyalty programs

The Group operates a customer loyalty program that provides a variety of benefits for customers. The Group allocates the consideration received between products and services in a bundle including loyalty points as separate performance obligation based on their stand-alone selling prices.

### Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1	Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
Level 2	Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
Level 3	Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable. For financial instruments quoted in an active market, fair value is determined by reference to quoted market prices. Bid prices are used for assets and offer prices are used for liabilities.

For unquoted financial instruments, fair value is determined by reference to the market value of a similar investment, discounted cash flows, other appropriate valuation models or brokers' quotes.

For financial instruments carried at amortized cost, the fair value is estimated by discounting future cash flows at the current market rate of return for similar financial instruments.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Group determines classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

### Foreign currencies

Transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing on the dates of the transactions.

At each reporting date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rates prevailing at that date. Nonmonetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences are recognised in consolidated statement of profit or loss.

### Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

### Cash and cash equivalents

Cash and cash equivalents in the consolidated statement of financial position comprise cash at banks and on hand, short-term deposits with a maturity of three months or less, which are subject to an insignificant risk of changes in value and restricted cash. If original maturity of deposits exceeds three months, they are classified as short-term investments.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts and restricted cash.

Restricted cash from Grants are held only for the purposes they are kept for, and are only released according to the terms of the agreements.

#### Restricted donations from Grants

A grant is recognized when there is reasonable assurance that the grant will be received and the conditions attached to them are complied with.

When the grant relates to an expense item, it is recognized as income over the period necessary to match on a systematic basis to the costs that it is intended to compensate.

#### Orange Money - units in circulation

Orange Money is a money transfer, payment and financial services solution provided through an electronic money (e-units) account that can be initiated using a valid mobile phone number.

E-units in circulation represent customers' e-unit accounts. The Group deposits a cash amount that equals the e-units in circulation to a restricted bank account which is monitored by the Central Bank of Jordan. E-units in circulation are recognized when customers deposit cash of the same amount at any of the Group's shops or bank account.

#### Current versus non-current classification

The Group presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in the normal operating cycle.
- Held primarily for the purpose of trading.
- Expected to be realized within twelve months after the reporting period or;
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current. A liability is current when:

- It is expected to be settled in the normal operating cycle.
- It is held primarily for the purpose of trading.
- It is due to be settled within twelve months after the reporting period or,
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Group classifies all other liabilities as non-current. Deferred tax assets and liabilities are classified as non-current assets and liabilities.

#### Customer contract assets and liabilities

Customer assets and customer liabilities mainly arise from the difference in revenue recognition and customer invoicing. Contract assets mainly concern amounts allocated pursuant to IFRS 15 to consideration for goods and services transferred to a customer, where the unconditional right to collect is subordinate to the transfer of other goods or services under the same contract (or group of contracts). This is the case in a bundled offering combining the sale of an equipment and services for a fixed-period, where the equipment is invoiced at a reduced price leading to the reallocation of a portion of amounts invoiced for services to the supply of the equipment. The excess of the amount allocated to the equipment over the price invoiced is recognized as a contract asset and transferred to trade receivables as the service is invoiced. Contract assets, like trade receivables, are subject to impairment for credit risk. The recoverability of contract assets is also verified and notably the risk of loss in value due to contract interruption. Recoverability may also be impacted by a change in the legal environment governing offerings.

Contract liabilities represent amounts paid by customers before receiving the goods and/or services promised in the contract. This is typically the case for advances received from customers or amounts invoiced and paid for goods or services not yet transferred, such as contracts payable in advance or prepaid packages (previously recorded in deferred revenue).

#### 4. Critical accounting judgements and key sources of estimation uncertainty

In applying the Group's accounting policies, which are described in the note above, the directors are required to make judgements (other than those involving estimations) that have a significant impact on the amounts recognised and to make estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

#### Critical judgements in applying the Group's accounting policies

The following are the critical judgements, apart from those involving estimations (which are presented separately below), that the directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in financial statements.

#### Identifying performance obligations in a bundled sale of equipment and installation services

The Group provides telecommunications services that are either sold separately or bundled together with the sale of equipment (handsets) to a customer. The Group uses judgement in determining whether equipment and services are capable of being distinct. The fact that the Group regularly sells both equipment and services on a stand-alone basis indicates that the customer can benefit from both products on their own. Consequently, the Group allocated a portion of the transaction price to the equipment and the services based on relative stand-alone selling prices.

#### Judgements in determining the timing of satisfaction of performance obligations

The Group generally recognise revenue over time as it performs continuous transfer of control of these services to the customers. Because customers simultaneously receives and consumes the benefits provided by these services and the control transfer takes place over time, revenue is also recognised based on the extent of service transfer/ completion of transfer of each performance obligation. In determining the method for measuring progress for these performance obligations, the Group considered the nature of these services as well as the nature of its performance.

For performance obligations satisfied at a point in time, the Group considers the general requirements of control (i.e. direct the use of asset and obtain substantially all benefits) and the following non-exhaustive list of indicators of transfer of control:

- Entity has present right to payment.
- Customer has legal title.
- Entity has transferred legal possession.
- Customer has significant risk and rewards.
- Customer has accepted the asset.

In making their judgment, the directors considered the detailed criteria for the recognition of revenue set out in IFRS 15 and, in particular, whether the Group had transferred control of the goods to the customer. Following the detailed quantification of the Group's liability in respect of rectification work, and the agreed limitation on the customer's ability to require further work or to require replacement of the goods, the directors are satisfied that control has been transferred and that recognition of the revenue in the current year is appropriate, in conjunction with the recognition of an appropriate warranty provision for the rectification costs.

#### Principal versus agent considerations

Revenue from value added services (VAS) sharing arrangements depend on the analysis of the facts and circumstances surrounding these transactions. The determination of whether the Group is acting as an agent or principal in these transactions require significant judgement and depends on the following factors:

- The Group is primarily responsible for fulfilling the promise to provide the service.
- Whether the Group has inventory risk.
- Whether the Group has discretion in establishing the price.

#### Consideration of significant financing component in a contract

The Group sells bundled services on a monthly payment scheme over a period of one to three years.

In concluding whether there is a significant financing component in a contract requires significant judgements and is dependent on the length of time between the customers payment and the transfer of equipment to the customer, as well as the prevailing interest rates in the market. The Group has concluded that there is no significant financing component in its contract with customers after such assessment.

In determining the interest to be applied to the amount of consideration, the Group has concluded that the interest rate implicit in the contract (i.e., the interest rate that discounts the cash selling price of the equipment to the amount paid in advance) is appropriate because this is commensurate with the rate that would be reflected in a separate financing transaction between the entity and its customer at contract inception.

#### Determining the lease term

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension and termination options are included in a number of leases across the Group. These terms are used to maximise operational flexibility in terms of managing contracts. Extension options (or periods after termination options) are only included in the lease term if the lessee is reasonably certain to extend (or not to terminate) the lease. The assessment is reviewed if a significant event or a significant change in circumstances occurs which affects this assessment and that is within the control of the lessee.

#### Internally generated intangible asset development costs

The Group capitalises costs for product development projects. Initial capitalisation of costs is based on management's judgement that technological and economic feasibility is confirmed. In determining the amounts to be capitalised, management makes assumptions regarding the expected future cash generation of the project, discount rates to be applied and the expected period of benefits. The carrying amount of capitalised development costs was JD 5,412,989 as of December 31, 2022 (from which JD 1,807,857 are still in progress), (December 31, 2021: JD 3,231,060 , from which JD 911,523 were in progress).

#### Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting period that may have a risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

#### Provision for expected credit losses

The Group uses a provision matrix to calculate ECLs for trade receivables, due from telecom operators and contract assets. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns.

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year, which can lead to an increased number of defaults the historical default rates are adjusted. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

#### Taxes

The Group's current tax provision relates to management's assessment of the amount of tax payable on open tax positions where the liabilities remain to be agreed with the income and sales tax department.

The Group is subject to income taxes in Jordan. Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognizes a liability for anticipated taxes based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made. Any changes in the estimates and assumptions used as well as the use of different, but equally reasonable estimates and assumptions may have an impact on the carrying values of the deferred tax assets.

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits, together with future tax planning strategies.

#### Provision and contingent liabilities

The Group's management determines provision on best estimate of the expenditure required to settle the present obligation as a result of the past event at the reporting date.

Contingent liabilities are potential liabilities that arise from past events whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

Provisions for liabilities are recorded when a loss is considered probable and can be reasonably estimated.

As stated in note 28 below, the Group's signed an agreement with the Telecommunications Regulatory Commission (TRC) related to a settlement of the historical revenue sharing disputes and providing the 5G frequencies license, Management believes that attributing amounts stated in the settlement signed agreement provides an appropriate basis for measuring the cost of each component of the settlement.

#### Useful lives of property and equipment

The Group's management determines the estimated useful lives of its property and equipment based on the period over which the assets are expected to be available for use. The estimated useful lives of property and equipment are reviewed at least annually and are updated if expectations differ from previous estimates due to physical wear and tear and technical or commercial obsolescence on the use of these assets. It is possible that future results of operations could be materially affected by changes in these estimates brought about by changes in factors mentioned above. A reduction in the estimated useful lives of property and equipment would increase depreciation expense and decrease noncurrent assets.

During the year 2022, the Group's management has reviewed the estimated useful lives for specific assets in the telecommunications equipment category taking into consideration the Group's policies, procedures and the telecom industry's best practice. Based on the review, the Group's management decided to adjust the useful lives of these assets in order to be consistent with the expected pattern of economic benefits. This adjustment resulted in increase in depreciation expenses amounting to JD 6,894,770 for the year 2022 and will result in a decrease in depreciation expense with the same amount in 2023.

#### Useful lives of intangible assets

The Group's management determines the estimated useful lives of its intangible assets for calculating amortisation. This estimate is determined based on the expected pattern of consumption of future economic benefits embodied in the asset. As part of the agreement with the Telecommunications Regulatory Commission (TRC) to extend spectrum and individual licenses validities for additional 10 years, therefore, the total license validity shall become 25 years, to be in line with the international practice, without changing the value of these licenses, accordingly, the adjustment of the useful life of the existing licenses has resulted in decrease in amortization by JD 4,317,052 for the year 2022.

#### Impairment of non-financial assets

The Group assesses whether there are any indicators of impairment for all non-financial assets at each reporting date. Non-financial assets tested for impairment when such indicators exist.

If there are indications of impairment, the Group tests non-financial assets for impairment to determine their recoverable amounts based on value-in-use calculations or at fair value less costs to sell. The value in use includes estimates on growth rates of future cash flows, number of years used in the cash flow model and the discount rates. The fair value less cost to sell estimate is based on recent/intended market transactions and the related EBITDA multiples used in such transactions.

#### Discounting of lease payments

The lease payments are discounted using the Company's incremental borrowing rate ("IBR"). Management has applied judgments and estimates to determine the IBR at the commencement of lease.

#### Impairment of inventories

When inventories become old or obsolete, an estimate is made of their net realisable value. For individually significant amounts, this estimation is performed on an individual basis. Inventories which are not individually significant, but which are old or obsolete, are assessed collectively and a provision applied according to the inventory type and the degree of ageing or obsolescence, based on historical selling prices.

## 5. Segment information

The Group's operating businesses are organized and managed separately according to the nature of the services provided, with each segment representing a strategic business unit that offers different services.

The Fixed-line voice segment constructs, develops, maintains fixed telecommunication network services and provides fiber to home services.

The Mobile communications segment installs, operates and manages a cellular network in Jordan.

The Data services segment provides, furnishes, installs, maintains, engineers and operates communication facilities for the provision of data network and internet access services to its customers and helping companies to be more efficient in the way they do their business on internet.

The renewable energy segment provides the Group with its need from electricity through managing the solar farms and renewable energy projects.

The mobile payments segment provides the customers with electronic wallets services which enable them to execute financial payments through their mobile phones.

The non-for-profit segment supports the local socio-economic development through academic initiatives in the areas of sustainable economics, social responsibility, environment, health, culture and science. This segment is not operating up to the date of this consolidated financial statements.

The Group's management monitors the operating results of the operating segment separately for making decisions about performance assessment; segment performance is calculated based on operating profit or loss.

The following tables represent revenues and profit and certain assets and liabilities information of the Group's business segments for the years ended December 31, 2022 and 2021

\* During the year 2022, the Group's management has reviewed the estimated useful lives for specific assets in the telecommunications equipment category taking into consideration the Group's policies, procedures and the telecom industry's best practice. Based on the review, the Group's management decided to adjust the useful lives of these assets in order to be consistent with the expected pattern of economic benefits. This adjustment resulted in increase in depreciation expenses amounting to JD 6,894,770 for the year 2022 and will result in a decrease in depreciation expense by the same amount in 2023.

## 7. Intangible Assets

<b>As of December 31, 2021</b>	<b>32,261,777</b>	<b>334,743,044</b>	<b>11,142,323</b>	<b>911,523</b>	<b>379,058,667</b>
<b>Accumulated amortization</b>					
As of January 1, 2021	17,208,783	150,674,386	5,872,344	-	173,755,513
Amortization	1,926,030	21,456,126	752,426	-	24,134,582
<b>As of December 31, 2021</b>	<b>19,134,813</b>	<b>172,130,512</b>	<b>6,624,770</b>	<b>-</b>	<b>197,890,095</b>
<b>Net book value</b>					
<b>As of December 31, 2021</b>	<b>13,126,964</b>	<b>162,612,532</b>	<b>4,517,553</b>	<b>911,523</b>	<b>181,168,572</b>

\* Projects under progress represent several software and applications developed internally by the group, the development costs were JD 1,807,857 as of December 31, 2022 (JD 911,523 as of December 31, 2021). The management expect to complete the projects during 2023 and the expected cost to complete around JD 7 million.

As part of the agreement with the Telecommunications Regulatory Commission (TRC) –note 28 the spectrum and individual licenses validities extended for additional 10 years, therefore, the total license validity shall become 25 years, to be in line with the international practice, without changing the value of these licenses, accordingly, the adjustment of the useful life of the existing licenses has resulted in decrease in amortization by JD 4,317,052 for the year 2022.

## 8. Leases

The Group has lease contracts for various items of shops, buildings, network sites and other items used in its operations. Leases of shops and buildings generally have lease terms between 2 and 15 years, while network sites and others generally have lease terms between 2 and 20 years. The Group's obligations under its leases are secured by the lessor's title to the leased assets. Generally, the Group is restricted from assigning and subleasing the leased assets.

The Group also has certain leases of apartments for expatriate employees with lease terms of 12 months or less. The Group applies the 'short-term lease' recognition exemption for these leases.

### a. Right-of-use Assets

Set out below are the carrying amounts of right-of-use assets recognized and the movements during the year:

For the year 2022	Shops and Buildings JD	Network Sites (Fixed and Mobile) JD	Others JD	Total JD
As of January 1, 2022	8,847,090	26,870,736	25,220	35,743,046
Additions	320,970	7,982,449	38,828	8,342,247
Depreciation	(1,632,106)	(4,918,857)	(38,526)	(6,589,489)
<b>As of December 31, 2022</b>	<b>7,535,954</b>	<b>29,934,328</b>	<b>25,522</b>	<b>37,495,804</b>

For the year 2021	Shops and Buildings JD	Network Sites (Fixed and Mobile) JD	Others JD	Total JD
As of January 1, 2021	9,859,983	32,419,815	22,297	42,302,095
Additions	669,015	1,794,011	41,148	2,504,174
Termination (disposals)	(80,861)	(2,438,321)	-	(2,519,182)
Depreciation	(1,601,047)	(4,904,769)	(38,225)	(6,544,041)
<b>As of December 31, 2021</b>	<b>8,847,090</b>	<b>26,870,736</b>	<b>25,220</b>	<b>35,743,046</b>

### b. Lease Liabilities

Lease liabilities related to Right of Use assets are discounted in line with the Group's policy. Liabilities are discounted at rates ranging between 4.4% - 7.56% depending on the liabilities contract term which range between 2-20 years.

Set out below are the carrying amounts of lease liabilities and the movements during the year:

	2022 JD	2021 JD
As of January 1,	38,645,138	44,192,468
Additions	8,342,247	2,504,174
Termination (disposals)	-	(2,519,182)
Interest expense	2,434,103	2,443,427
Payments	(8,314,052)	(7,975,749)
<b>As of December 31,</b>	<b>41,107,436</b>	<b>38,645,138</b>

The allocation of short and long-term lease liabilities was as follows:

	2022 JD	2021 JD
Current	6,254,047	5,749,642
Non-current	34,853,389	32,895,496
	<b>41,107,436</b>	<b>38,645,138</b>

The maturity analysis lease of liabilities was as follows:

	2022 JD	2021 JD
Not later within 1 year	6,254,048	5,749,642
Later than 1 year and not later than 5 years	20,292,476	16,617,310
Later than 5 years	14,560,912	16,278,186
	<b>41,107,436</b>	<b>38,645,138</b>

The maturity analysis of undiscounted lease liabilities was as follows:

	2022 JD	2021 JD
Not later within 1 year	8,426,711	7,855,270
Later than 1 year and not later than 5 years	24,753,824	23,122,499
Later than 5 years	20,894,524	18,928,218
	<b>54,075,059</b>	<b>49,905,987</b>

Amounts recognized in consolidated statement of profit and loss:

	2022 JD	2021 JD
Depreciation expense on right-of-use assets	6,589,489	6,544,041
Interest expense on lease liabilities	2,434,103	2,443,427
Expense relating to short-term leases	132,709	482,686
	<b>9,156,301</b>	<b>9,470,154</b>

## 9. Renewable Energy Asset

During the year 2018, the Group entered through its subsidiary E-Dimension in a Design, Build, Finance and Operate solar photovoltaic power plants agreement to self-generate electricity for the Group's own use from different locations in Jordan. According to the agreement, the Group engaged a private sector entity to plan, design, engineer, procure, turnkey construct, finance, operate, maintain and transfer, the PV power plants after 20 years from the date of operations.

During 2019, the private entity engaged to execute the agreement, completed the construction of the solar photovoltaic power plants and started the operations in all locations. Accordingly, the Group Renewable Energy Asset was capitalized at the present value of the minimum payments amounted to JD 42,246,856, using the incremental borrowing rate of 7.56%. The renewable energy asset is depreciated over the agreement term which is 20 years which represent the useful life of the asset as per the management assessment, the payments are apportioned between interest (recognized as finance costs) and reduction of the renewable energy liability.

The net book value of the renewable energy assets and the movement on it were as follows:

	2022 JD	2021 JD
As of January 1,	36,344,076	38,456,419
Depreciation	(2,112,343)	(2,112,343)
<b>As of December 31,</b>	<b>34,231,733</b>	<b>36,344,076</b>

The movements on the renewable energy liability were as follows:

	2022 JD	2021 JD
As of January 1,	38,570,038	39,798,490
Interest expense	2,762,968	3,007,594
Payments	(3,891,504)	(4,236,046)
<b>As of December 31,</b>	<b>37,441,502</b>	<b>38,570,038</b>

The allocation for the renewable energy assets lease liabilities between current and non-current were as follows:

	2022 JD	2021 JD
Current	5,971,327	4,498,282
Non-current	31,470,175	34,071,756
	<b>37,441,502</b>	<b>38,570,038</b>

This liability is guaranteed by Jordan Telecommunications Company and Petra Jordanian Mobile Telecommunications Company.

Future payments under the agreement together with the present value of the payments were as follows:

	2022 JD	2021 JD
Within one year	5,031,462	4,306,468
After one year but not more than five years	16,856,234	16,986,403
More than five years	43,671,648	48,157,977
<b>Total minimum payments</b>	<b>65,559,344</b>	<b>69,450,848</b>
<b>Less:</b> amounts representing finance charges	(28,117,842)	(30,880,810)
<b>Present value of liability</b>	<b>37,441,502</b>	<b>38,570,038</b>

## 10. Income Tax

### a. Income Tax Expense

Income tax expense reported in the consolidated statement of profit and loss and comprehensive income as follows:

	2022 JD	2021 JD
Income tax charge – current year	17,469,237	11,308,659
National contribution – current year	1,455,784	942,080
Effect of deferred tax	(156,826)	(160,724)
	<b>18,768,195</b>	<b>12,090,015</b>

The reconciliation between income tax expense at the statutory income tax rate and income tax expense at the Group's effective income tax rate was as follows:

	2022 JD	2021 JD
Accounting profit before income tax	62,799,223	38,214,306
<b>At statutory income tax rate of*</b>	<b>16,327,798</b>	<b>9,935,720</b>
<b>Tax adjustments for:</b>		
Tax effect of provision for expected credit losses	156,000	258,636
Tax effect of debts written off	-	(1,150,113)
Tax effect of non-tax-deductible expenses and provisions	4,087,121	3,463,138
Tax effect of non-taxable gain on disposal of land	(1,802,724)	(417,366)
<b>Reported income tax</b>	<b>18,768,195</b>	<b>12,090,015</b>
<b>Effective income tax rate%</b>	<b>29.9%</b>	<b>31.6%</b>

\* The income tax provision for the years ended December 31, 2022 and 2021 were calculated in accordance with the income tax law No. (38) of 2018 which includes statutory tax rate of 24% and national contribution of 2% for the Company. The tax rate on subsidiaries ranges from 20% to 24% and national contribution ranges from 2% to 4%.

### b. Income Tax Provision

Movement on the income tax provision during the year is as follows:

	2022 JD	2021 JD
As of January 1,	12,548,210	9,789,625
Income tax charge for the year	17,469,237	11,308,659
	<b>30,017,447</b>	<b>21,098,284</b>
<b>Less:</b> Income tax paid	(12,483,966)	(8,471,133)
Withholding tax on interest income	(132,250)	(78,941)
<b>As of December 31</b>	<b>17,401,231</b>	<b>12,548,210</b>

### c. Deferred Tax Assets

Deferred tax assets at December 31, is related to the following items:

	2022 JD	2021 JD
Carried forward losses*	2,576,742	2,576,742
Deferred tax impact	837,379	680,553
Legal cases provision	360,368	360,368
	<b>3,774,489</b>	<b>3,617,663</b>

\* Deferred tax assets have not been recognized in respect of the full amount these losses as they may not be used to offset taxable profits elsewhere in the Group, they have arisen in Petra Jordanian Mobile Telecommunications Company that have been loss-making for some time, and there are no other tax planning opportunities or other evidence of recoverability in the near future.

### d. Tax Status

The below table represents the tax status and tax rate for the Company and its subsidiary companies:

Company's Name	Final Settlements Up To
Jordan Telecommunications	2018
Petra Jordanian Mobile Telecommunications	2020
Jordan Data Communications	2020
Dimension Company for Digital Development of Data	2018
Petra Mobile Payment Services Company	2019
Future Pioneers for Development and Initiatives	2021

## 11. Inventories

The details of this item are as follows:

	2022 JD	2021 JD
Materials and supplies*	9,795,185	8,908,094
Handsets and others	4,195,222	2,857,765
Provision for damaged and slow-moving inventories	(1,605,908)	(1,605,908)
	<b>12,384,499</b>	<b>10,159,951</b>

\* The materials and supplies are held for own use and are not for resale. During 2022, an amount of JD 16,245,980 (JD 15,890,696 during 2021) was recognized as a direct operating cost and inventories amounting to JD 9,010,803 (JD 8,517,965 during 2021) in materials and supplies were transferred to property and equipment.

Movement on the provision for damaged and slow-moving inventories is as follows:

	2022 JD	2021 JD
As of January 1,	1,605,908	1,522,339
Additions	-	100,000
Write offs	-	(16,431)
<b>As of December 31,</b>	<b>1,605,908</b>	<b>1,605,908</b>

## 12. Trade Receivables and Other Current Assets

The details of this item are as follows:

	2022 JD	2021 JD
Trade receivables	81,212,240	69,431,306
Contract assets - unbilled revenue	627,918	3,169,088
Amounts due from related parties (note 27)	3,201,504	3,390,240
	<b>85,041,662</b>	<b>75,990,634</b>
Allowance for expected credit losses and doubtful accounts	(8,340,173)	(7,884,310)
	<b>76,701,489</b>	<b>68,106,324</b>
Other current assets	30,121,280	41,323,674
	<b>106,822,769</b>	<b>109,429,998</b>

Trade receivables are non-interest bearing. The Group does not obtain collateral over trade receivables except for some distributors' trade receivables where guarantees are obtained.

Movements on the allowance for expected credit losses and doubtful accounts were as follows:

	2022 JD	2021 JD
As of January 1,	7,884,310	9,378,145
Provision for the year	600,000	794,755
Write offs	(144,137)	(4,423,513)
Transfer from other provisions	-	2,134,923
<b>As of December 31,</b>	<b>8,340,173</b>	<b>7,884,310</b>

Set out below is the information about the credit risk exposure on the Group trade receivables and contract assets:

As of December 31, 2022	Days past due					Total JD
	Current JD	1-30 days JD	31-90 days JD	91-180 days JD	>180 days JD	
Expected credit loss rate	-	5%	5%	5-20%	20-100%	
Estimated gross carrying amount at default	6,342,657	7,700,469	5,320,149	5,222,611	60,455,776	<b>85,041,662</b>
Expected credit loss	-	385,024	266,007	365,583	7,323,559	<b>8,340,173</b>

As of December 31, 2021	Days past due					Total JD
	Current JD	1-30 days JD	31-90 days JD	91-180 days JD	>180 days JD	
Expected credit loss rate	-	5%	5%	5-20%	20-100%	
Estimated gross carrying amount at default	6,073,287	9,296,456	7,502,322	2,404,430	50,714,139	<b>75,990,634</b>
Expected credit loss	-	464,823	375,116	360,665	6,683,706	<b>7,884,310</b>

Management determines the expected credit losses on customers' balances and builds up a provision based on different factors including analysis of customer or group of customer's behaviours.

Unimpaired receivables are expected to be fully recoverable. The Group has a credit department that continuously monitors the credit status of the Group's customers. Service will be disconnected for customers exceeding certain limits for certain period of time.

## Land Expropriation

Trade receivables and other current assets category includes the cost of plots of land with a total amount of JD 274,356 as of December 31, 2022 (JD 1,893,184 as of December 31, 2021) that were expropriated by Greater Amman Municipality (GAM) in previous years.

During 2018, the Group signed an agreement with GAM to settle the land expropriation lawsuit and due to delay in payment, a memorandum of understanding was signed during April 2021, with GAM in which GAM agreed to settle the remaining amounts due to Jordan Telecom through monthly equal payments starting from 2022 to 2025. Accordingly, the Group has received an amount of JD 4,000,000 during the year ended December 31, 2022 (JD 2,100,000 during the year 2021) as a partial settlement.

## 13. Balances Due From / To Telecom Operators

The Group has agreements with local and foreign telecom operators, whereby amounts due from and to the same operator are subject to the right of offset. The net balances are as follows:

	2022 JD	2021 JD
Balances due from telecom operators	4,584,558	5,327,990
Amounts due from related parties (note 27)	334,396	468,686
	<b>4,918,954</b>	<b>5,796,676</b>
Allowance for expected credit losses and doubtful accounts	(3,350,442)	(3,350,442)
<b>Balances due from telecom operators</b>	<b>1,568,512</b>	<b>2,446,234</b>
Balances due to telecom operators	19,408,221	17,236,423
Amounts due to related parties (note 27)	2,354,123	1,209,106
<b>Balances due to telecom operators</b>	<b>21,762,344</b>	<b>18,445,529</b>

Balances due from/to telecom operators are non-interest bearing and not guaranteed.

Movements on the allowance for expected credit losses and doubtful accounts were as follows:

	2022 JD	2021 JD
As of January 1,	3,350,442	3,150,442
Provision for the year	-	200,000
<b>As of December 31,</b>	<b>3,350,442</b>	<b>3,350,442</b>

Set out below is the information about the credit risk exposure on the Group's balances due from telecom operators:

As of December 31, 2022	Days past due					Total JD
	Current JD	1-90 days JD	91-180 days JD	180-270 days JD	>271 days JD	
Expected credit loss rate	-	40%-50%	50%-60%	60%-70%	70%-100%	
Estimated gross carrying amount at default	691,869	1,079,540	144,772	276,014	2,726,759	<b>4,918,954</b>
Expected credit loss	-	539,770	72,386	138,007	2,600,279	<b>3,350,442</b>

As of December 31, 2021	Days past due					Total JD
	Current JD	1-90 days JD	91-180 days JD	180-270 days JD	>271 days JD	
Estimated gross carrying amount at default	1,051,100	2,239,329	184,550	171,219	2,150,478	<b>5,796,676</b>
Expected credit loss	-	969,381	110,730	119,853	2,150,478	<b>3,350,442</b>

Unimpaired amounts due from telecommunication operators are expected to be fully recoverable.

#### 14. Cash and Cash Equivalents

The cash and cash equivalents in the consolidated statement of cash flows represent the balance of cash and short-term deposits netted by the balance of the overdrafts and restricted cash as follows:

	2022 JD	2021 JD
Cash and short-term deposits	64,320,009	57,327,137
<b>Less: Due to banks</b>	<b>(42,067,901)</b>	<b>(43,112,473)</b>
Restricted cash / Customers accounts -E-units*	(14,922,325)	(8,936,368)
Restricted cash / Grants funds**	(94,879)	(1,430,750)
	<b>7,234,904</b>	<b>3,847,546</b>

Cash and short-term deposits include deposits with commercial banks in Jordan for periods that ranges between one day and three months in Jordanian Dinars, and US Dollars amounting to JD 63,963,553 as of December 31, 2022 and JD 54,379,891 as of December 31, 2021 with an effective interest rate of JD 3.26% and USD 2.4%, respectively (2021: JD 2.59% and USD 0.23%).

\* The balance in this account represents restricted cash relating to e-units in circulation in Petra Mobile Payment Service Company (Orange Money) in compliance with the Central Bank of Jordan's requirements (note 21).

\*\* The Group obtained four grants (two in 2020 and two in 2021) for the purpose of providing funding to promote Jordan Telecom's innovation initiatives, including the Group's coding academy and other academic programs. The Grants are restricted as per the conditions of the contracts (note 22).

#### Due to banks

This item represents the utilized amount of the credit facilities granted to the Group from Jordanian commercial banks with a ceiling of JD 65 million as of December 31, 2022 (JD 50 million as of December 31, 2022). Interest rates on the credit facilities granted ranges from 6.30% to 7.275% during the year 2022 ( 5.15% to 5.25% during the year 2021). These overdrafts are unsecured.

#### 15. Paid in Capital

Jordan Telecommunications Company (the Company) authorized and paid in capital consists of 187,500,000 shares (2020: 187,500,000 shares) with par value of one Jordanian Dinar each.

#### 16. Statutory Reserve

As required by the Jordanian Companies' Law, 10% of the Company's net income before tax is transferred to statutory reserve. The Company may resolve to discontinue such annual transfers when the balance of the reserve reaches 25% of the paid in capital. The Group has elected not to transfer any amount to the statutory reserve starting from the year 2005. The statutory reserve is not available for distribution to the shareholders.

#### 17. Dividends Paid and Proposed

The Board of Directors proposed to the General assembly in its meeting that held on February 2, 2023 a cash dividends of JD 0.210 per share totalling JD 39,375,000.

The General Assembly in its meeting which was held on April 21, 2022 has approved a cash dividend of JD 0.144 per share totalling JD 27,000,000 for the year 2021.

On April 29, 2021, the General Assembly approved a cash dividend of JD0.10 per share totalling JD 18,750,000 for the year 2020.

#### 18. Telecommunications License Payable

This amount represents the cash price equivalent of the JD 104,250,000 deferred payments for the renewal of the 900 MHz spectrum license which was renewed on May 9, 2019 for an additional 10 years, in accordance with the settlement agreement signed with the Government of Jordan during October 2016.

The Group has calculated the cash price equivalent of the deferred payments amounting to JD 86,595,425 using a discount rate of 4%, which represents the average borrowing rate for the Group at the date of the agreement.

Future payments under the settlement agreement together with the present value of the payments were as follows:

	2022 JD	2021 JD
Within one year	-	-
After one year but not more than five years	52,125,000	52,125,000
More than five years	-	-
<b>Total payments</b>	<b>52,125,000</b>	<b>52,125,000</b>
<b>Less: amounts representing finance charges</b>	<b>(2,408,403)</b>	<b>(4,184,296)</b>
<b>Present value of liability</b>	<b>49,716,597</b>	<b>47,940,704</b>

During the year 2022, an amount of JD 1,775,893 was recognised as interest expense on the consolidated statement of profit or loss and other comprehensive income (JD 1,775,893 during the year 2021).

## 19. Loans

This item consists of the following:

Loan	Loan Amount	Currency	Annual Interest Rate %	Agreement Date	Number of Instalments	Principal and Interest Payment Terms	Grace Period Months	Due Date
French Government Protocol/ Second	52,000,000	FRF	1.00	23 February 1995	40	Semi-annual	126	2029

### French Government Protocol /Second Loan

On February 23, 1995 the Government of Jordan, represented by the Ministry of Planning, signed a financial protocol with the Government of the Republic of France to finance several development projects including an FRF 52,000,000 loan to finance the construction and operation of Tla'a Al-Ali Communication Switch Unit.

The loan is subject to an annual interest rate of 1% payable on the total amount outstanding from the date of each drawing and shall be paid semi-annually.

The principal payments of each withdrawal is payable in 40 equal semi-annual instalments, the first instalment falling due 126 months after the end of the calendar quarter during which each drawing is made. Drawings commenced on July 1, 1995. The repayment of this loan started on March 31, 2006.

### French Government Protocol / Third Loan

On October 24, 1996 the Government of Jordan represented by the Ministry of Planning signed a financial protocol with the Government of the Republic of France to finance several development projects including an FRF 15,000,000 loan to finance the construction of Al-Ashrafia Communication Switch Unit.

The loan is subject to an annual interest rate of 1% payable on the total amount outstanding and shall be paid semi-annually.

The principal payments of each withdrawal are payable in 30 equal consecutive semi-annual instalments, the first instalment falling due 90 months after the end of the calendar quarter during which each drawing is made. Drawings commenced on July 1, 1997. Repayment of this loan started on March 31, 2005.

### Arab Bank Loan

On December 24, 2017, Petra Jordanian Mobile Telecommunications Company (Orange Mobile) has signed a JD 22,800,000 loan agreement with Arab Bank to finance the acquisition of frequency license (10 + 10 MHz) in 2600 MHz band.

The floating interest rate on the loan 6.50%, which represents the prime lending rate for the bank minus 3%, and it is calculated and paid on a monthly basis over the utilized balance.

The utilized loan balance is payable in 14 equal semi-annual instalments, the first instalment was due and paid on 30 June 2018 and the final instalment is due in seven years from the date of the loan agreement. The loan is secured by Jordan Telecommunications Company.

### Capital Bank Loan (previously, Societe Generale De Banque – Jordanie)

On December 26, 2017, Petra Jordanian Mobile Telecommunications Company (Orange Mobile) has signed a JD 6,000,000 loan agreement with Societe Generale De Banque – Jordanie to finance the acquisition of frequency license (10 + 10 MHz) in 2600 MHz band.

The floating interest rate on the loan is 7.35%, and it is calculated and paid on a monthly basis over the utilized balance.

The utilized loan balance is payable in 14 equal semi-annual instalments, the first instalment was due and paid on June 30, 2019 and the final instalment is due in seven years from the date of the loan agreement.

### The Housing Bank for Trade and Finance Loan

On May 8, 2019, Petra Jordanian Mobile Telecommunications Company (Orange Mobile) has signed a JD 25,000,000 loan agreement with The Housing Bank for Trade and Finance to finance the first instalment of the 900MHz spectrum license. The interest rate is fixed at 6.375% and is calculated and paid on a semi-annual basis.

The utilized loan balance is payable in 10 equal semi-annual instalments, the first instalment was due and paid on November 7, 2019. This loan is secured by Jordan Telecommunications Company.

### Cairo Amman Bank Loan

On May 8, 2019, Petra Jordanian Mobile Telecommunications Company (Orange Mobile) signed a JD 20,000,000 loan agreement with Cairo Amman Bank to finance the first instalment of the 900MHz spectrum license. The interest rate is fixed at 6.5% and is calculated and paid on a semi-annual basis.

The utilized loan balance is payable in 10 equal semi-annual instalments, the first instalment was due and paid on November 7, 2019. This loan is secured by Jordan Telecommunications Company.

## 20. Employees' End of Service Benefits

During May 2011, the Group signed an agreement with the General Trade Union for Public Services and Free Vocations whereby the Group shall provide additional benefits to the employees which include the option for all employees to liquidate their end of service benefit accumulated up to December 31, 2011 during 2012 with an option of either to accumulate the end of service benefits again starting from January 1, 2012 or have the benefit added to their monthly salary.

In accordance with the Group's by-laws, the Group provides end of service benefits for its employees who have chosen the option to accumulate the end of service benefits starting from January 1, 2012.

The movements on end of service benefits were as follows:

	2022 JD	2021 JD
Provision at 1 January	546,079	523,521
Expenses for the year	48,096	81,157
End of service benefits paid	(153,005)	(58,599)
<b>Provision at December 31</b>	<b>441,170</b>	<b>546,079</b>

The allocation for the Employees' end of service benefits between current and non-current were as follows:

	2022 JD	2021 JD
Employees' end of service benefits – current	24,491	87,113
Employees' end of service benefits – non-current	416,679	458,966
	<b>441,170</b>	<b>546,079</b>

## 21. Orange Money – units in circulation

This account represents customers' electronic unit accounts in Petra Mobile Payment Service Company (Orange Money). Orange Money is a money transfer and payment solution through an electronic money (e-units) account that can be initiated using a valid mobile phone number.

Customers' account balances of e-units in circulation amounted to JD 14,922,325 As at December 31, 2022 (JD 8,936,368 As at December 31, 2021).

As per the Central Bank of Jordan's requirements, the Company is required to deposit an amount that equals the e-units in circulation to restricted bank account which is monitored by the Central Bank of Jordan (note 14).

## 22. Trade Payables and Other Current Liabilities

The details of this item are as follows:

	2022 JD	2021 JD
Trade payables	66,181,439	57,948,178
Other provisions	5,541,600	48,524,479
Accrued expenses	19,947,220	19,684,918
Subscribers' deposits	16,208,918	16,592,867
Government revenue share payable	6,449,952	4,592,106
Amounts due to related parties (note 27)	8,243,724	8,267,021
Dividends payable	1,288,795	1,325,161
Restricted grants* (note 14)	94,879	1,430,750
Capital reduction payable to shareholders	174,801	204,743
	<b>124,131,328</b>	<b>158,570,223</b>

\* The Group obtained four grants (two in 2020 and two in 2021) for the purpose of providing funding to promote Jordan Telecom's innovation initiatives, including the Group's coding academy and other academic programs. The Grants are restricted as per the conditions of the contracts. The details of the Grants were as follows:

### EU Grant

During 2020, Jordan Telecommunications Company signed a Grant agreement with the European Union (EU) to fund an Innovation Space which promotes innovation culture, providing a space for innovation opportunities both virtually and physically, private sector innovation advice, support and financing. The EU Grant provides the Group with EURO 6,400,000 over three years. In December 2020, the Group received the first payment amounting to EURO 1,656,450. The Grant is restricted to conditions specified in the agreement.

### GIZ Grant

During 2020, Future Pioneers for Developments and Initiatives (Orange Foundation) signed a Grant agreement with Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) to fund Orange Digital Center which promotes creating an innovation ecosystem for young entrepreneurs in enhancing job-related digital skills, their employability, and thus contributing to reduce youth unemployment in Jordan. The (GIZ) Grant provides the Group with EURO 591,000 over two and a half years. In December 2020, the Group received the first payment amounting to EURO 269,461. The Grant is restricted to conditions specified in the agreement.

### ISSF Fund Grant

During 2021, Jordan Telecommunications Company signed a Grant agreement with the Innovative Startups and SMEs Fund (ISSF) to fund an AI Incubator, which promotes startups at the ideation stage through skill building, product development and access to opportunity. The (ISSF) Grant provides the Group with USD 250,000 over three years. In October 2021, the Group received the first payment amounting to USD 112,500. the Grant is restricted to conditions specified in the agreement.

### Orange Corporate Foundation Grants

- During 2020, Future Pioneers for Development and Initiatives signed a Grant agreement with the Orange Corporate Foundation to fund three Women's Digital Centers program under The Hashemite Fund for Human Development. The program is for the social and professional integration of women with no qualification, no employment and living in poverty in the countries where the Orange Group operates. This program aims to foster the women's economic empowerment through digital skills training. It is based on providing digital equipment, educational content and training courses. The Orange Foundation Grant provides Future Pioneers with Euro 25,000 for one year received during 2021, the Grant is restricted to conditions specified in the agreement.
- During 2021, Future Pioneers for Development and Initiatives signed a Grant agreement with the Orange Corporate Foundation to enable the country foundation to help acquire vaccines, medical equipment, and support public initiatives of local healthcare policies in order to step up the fight against the pandemic. The Orange Foundation Grant provides Future Pioneers with Euro 75,000 for one year. During 2021, Future Pioneers received the payment of Euro 75,000. The Grant is restricted to conditions specified in the agreement.

## 23. Customer contracts

### a. Revenue

Revenue is broken down by type of customers and product line as follows:

#### Voice Services

Voice services revenues are generated through incoming and outgoing calls on mobile network in addition to revenues from fixed narrowband services including roaming revenues from customers of other networks (national and international), and from network sharing.

#### Data Services

Data services revenues are generated from providing communication facilities for the provision of data network and internet access services on both fixed and mobile networks.

#### Other Services

Other services revenues represent all equipment sales (mobile phones, broadband equipment, connected objects and accessories) revenues from infrastructure services, applications services, security services, sales of equipment and mobile payment services related to the above products and services.

The details of revenues per type of customer and revenue were as follows:

	For the year ended December 31, 2022			
	Consumer Business Unit JD	Enterprise Business Unit JD	Whole Sales Business Unit JD	Total Revenues JD
Voice services	75,056,291	32,173,145	36,054,445	143,283,881
Data services	137,808,175	25,504,746	9,218,526	172,531,447
Other services	10,843,832	17,138,021	3,770,695	31,752,548
	<b>223,708,298</b>	<b>74,815,912</b>	<b>49,043,666</b>	<b>347,567,876</b>

	For the year ended December 31, 2021			
	Consumer Business Unit JD	Enterprise Business Unit JD	Whole Sales Business Unit JD	Total Revenues JD
Voice services	76,456,794	33,548,166	40,502,823	150,507,783
Data services	126,519,015	25,205,441	9,157,397	160,881,853
Other services	7,560,388	11,413,815	3,100,807	22,075,010
	<b>210,536,197</b>	<b>70,167,422</b>	<b>52,761,027</b>	<b>333,464,646</b>

The details of revenues per timing of revenue recognition were as follows:

	2022 JD	2021 JD
At a point in time	247,871,025	236,145,191
Overtime	99,696,851	97,319,455
	<b>347,567,876</b>	<b>333,464,646</b>

### b. Contract Assets

Pursuant to IFRS 15 "Revenue from contracts with customers" application and due to the timing of revenue recognition that may differ from that of customer invoicing which is mainly related to the bundled offering combining the sale of a equipment and other services for a fixed-period, where the equipment is invoiced at a reduced price leading to the reallocation of a portion of amounts invoiced for the other services to the supply of the equipment. The excess of the amount allocated to the equipment over the price invoiced is recognized as a contract asset.

Movements on the contract assets were as follows:

	2022 JD	2021 JD
As of January 1,	3,131,370	3,112,457
Additions	3,300,335	3,242,761
Amortization	(3,177,066)	(3,223,848)
<b>As of December 31,</b>	<b>3,254,639</b>	<b>3,131,370</b>

The allocation of the short and long-term contract assets was as follows:

	2022 JD	2021 JD
Non-current portion of contract assets	703,693	682,732
Current portion of contract assets	2,550,946	2,448,638
	<b>3,254,639</b>	<b>3,131,370</b>

Set out below the maturities pattern of the long-term contract assets:

	JD
2024	683,958
2025	19,735
	<b>703,693</b>

### c. Contract Liabilities

Contract liabilities represent amounts paid by customers before receiving the goods and/or services promised in the contract. This is typically the case for advances received from customers or amounts invoiced and paid for goods or services not yet transferred, such as contracts payable in advance or prepaid packages.

The allocation of short and long term contract liabilities is as follows:

	2022 JD	2021 JD
Non-current portion of contract liabilities	-	19,098
Current portion of contract liabilities	11,257,771	10,575,894
	<b>11,257,771</b>	<b>10,594,992</b>

## 24. Government Revenue Share

In accordance with the agreement signed with the Telecommunications Regulatory Commission (TRC), a percentage of certain telecommunications services revenues is payable to TRC as revenue share.

## 25. Business Support Fees and Brand Fees

The Group calculates and pays business support fees to Orange Group, in accordance with the agreement signed between the Group and Orange Group.

During July 2007, the Group entered into a license agreement with Orange Brand Services Limited whereby, Jordan Telecommunications Company, Petra Jordanian Mobile Telecommunications Company and Jordan Data Communications were granted the right to use Orange brand in Jordan in return for royalty fees at 1.6% of the operating revenues as defined in the agreement. The license agreement is valid for 10 years. The agreement has been renewed for a period of 10 years starting from July 2017.

## 26. Earnings Per Share

The details of this item are as follows:

	2022	2021
Profit for the year attributable to the equity holders of parent (JD)	44,031,028	26,124,291
Weighted average number of shares during the year	187,500,000	187,500,000
<b>Basic earnings per share</b>	<b>0.235</b>	<b>0.139</b>

No figure for diluted earnings per share has been calculated as there are no potentially dilutive ordinary shares outstanding.

## 27. Related Party Disclosures

Related parties are shareholders, senior management of the Group, and companies of which they are principal owners. Pricing policies and terms of these transactions are according to the commercial practices.

The sales to and purchases from related parties are made on terms equivalent to those that prevail in arm's length transactions. Outstanding balances at the year-end are unsecured and interest free and settlement occurs in cash.

Balances and transactions with related parties included in the consolidated statements of financial positions and consolidated statement of comprehensive income, respectively, were as follows:

	2022 JD	2021 JD
<b>Consolidated statement of financial position:</b>		
<b>Government of Jordan and Orange Group and its subsidiaries (shareholder)</b>		
Amounts due from related parties	3,535,900	3,858,926
Amounts due to related parties	10,597,847	9,476,127
<b>Consolidated statement of comprehensive income:</b>		
<b>Orange Group and its subsidiaries (shareholder)</b>		
Business support fees and brand fees	7,842,328	7,811,925
Operating expenses	10,087,260	8,872,115
Revenues	5,277,387	5,450,238
<b>Government of Jordan</b>		
Government revenue share	6,449,952	4,592,106
Revenues	9,094,027	14,430,338
<b>Key management personnel</b>		
Executives' salaries and bonus	1,887,744	1,737,321
Board of Directors remuneration	226,563	225,650

Balances due from and to related parties are disclosed in notes 12, 13 and 22 to these consolidated financial statements.

## 28. Agreement with Telecommunication Regulatory Commission

During January 2022, the Group has been notified by the Telecommunications Regulatory Commission (TRC) of the Prime Minister decision which was been issued on December 29, 2021, aiming to develop integrated reform bundle "to restructure the Telecom Sector", while taking into consideration the appropriate solutions to remedy the confronted challenges and obstacles which will contribute in increase the investment in telecom infrastructure expansion /development, internet services, broadband services and technologies, in addition to support penetration growth, usage variety to serve individuals and enterprises, and digital economy support, where the telecom companies represent one of the most important success pillars to complete the digital transformation in addition to introducing 5G technologies roll out in the Kingdom, which will produce a quantum leap in the economic growth and increase the sector job opportunities.

Therefore, the TRC in coordination with the Ministry of Digital Economy and Entrepreneurship, has been delegated to implement the proposed bundle with the Telecom Operators, which consist of the following:

1. Start with settlement agreement, in coordination with legal advisor office, to settle the revenue share issues between the TRC and the Operators.
2. Stop all legal proceedings in front of Courts which are related to disputes for the revenue share until the settlement agreement is signed or continue with these proceedings.
3. To calculate the revenue share amounts from accounting firm for the years from 2000 to 2020, in order to determine the final amounts for settlement on a 50% basis.
4. To extend spectrum and individual licenses validities for additional 10 years, therefore, the total license validity shall become 25 years, to be in line with the international practice, without changing the value of these licenses with a possibility to extend for further 5 years based on a specific criterion which will be evaluated after 3 years from the date of Settlement agreement signature.
5. Grant the operator's spectrum licenses in the 3500MHz band (5G), with 100MHz per each operator, for 25 years, with operators' commitment to start launching within 18 months, and to cover 50% of population within a period not exceeding 4 years from the spectrum grant date.
6. Conversion of 2100 MHz spectrum band into a technology neutral band.

The agreement has been signed on August 11, 2022 and became effective from September 6, 2022 after fulfilling all the needed requirements as per the agreement. Therefore, the summary of the impact as following:

	December 31, 2022 JD
Revenue share settlement	42,648,328
Intangible assets – 5G spectrum	30,000,000
<b>Total</b>	<b>72,648,328</b>
Upfront payment at 50%*	36,324,164
<b>Remaining liability amounts</b>	<b>36,324,164</b>

\* From this amount, the Group has paid only JD 15,724,164 after netting the deposit amount at TRC by JD 20,600,000 as per the agreement.

The remaining liability amounts is due over seven equal annual installments of JD 5,189,166 with 5% interest rate. Furthermore, the agreed on legal cases have been dropped as well.

The impact of the agreement on the Condensed Consolidated Interim Statement of Financial Position were as following:

	December 31, 2022 JD
<b>Non-Current Assets</b>	
Intangible assets – 5G spectrum	30,000,000
Capitalization of the annual frequency fees at present value*	19,742,336
<b>Total assets</b>	<b>49,742,336</b>
<b>Non-Current Liabilities</b>	
Other telecommunications license payable – 5G spectrum	31,134,998
5G spectrum deferred annual frequency fees at present value*	20,042,612
<b>Total non-current liabilities</b>	<b>51,177,610</b>
<b>Current Liabilities</b>	
Other telecommunications license payable - 5G spectrum	5,189,166
<b>Total liability</b>	<b>56,366,776</b>

\* This amount represents the cash price equivalent of the JD 44 million deferred payments for the annual license fees for “5G services” of JD 2 million per year during the license period, the Group has calculated the cash price equivalent of the deferred payments using a discount rate of 6%, which represents the average borrowing rate for the Group at the date of the agreement.

The impact on the consolidated statement of profit and loss and other comprehensive income were as following:

	December 31, 2022 JD
Reduction of amortization of intangible assets – useful life extension	4,317,052
Reversal of the revenue share provisions **	18,868,256
<b>Total</b>	<b>23,185,308</b>

\*\* The Group has reversed the excess provisions that were booked during prior years related to government revenue sharing as a result of settling the court cases below and the fact that the agreement includes the payment of only 50% of calculated revenue sharing, also the agreement includes offsetting the value of deposit amount that were paid to TRC during the prior years.

## 29. Commitments and Contingences

### Capital commitments

The Group enters into commitments during the ordinary course of business for major capital expenditures, primarily in connection with network expansion projects. Outstanding capital expenditure amounted to JD 26,823,248 as of December 31, 2022 (2021: JD 29,037,735).

### Operational commitments

The Group entered into a 6-year sponsorship commitment. Outstanding operational expenditure amounted to JD 1,500,000 as of December 31, 2022 (2021: JD 3,000,000).

### Legal claims

The Group is a defendant in a number of lawsuits with a value of JD 10,566,481 as of December 31, 2022 (December 31, 2021: JD 22,488,728) representing legal actions and claims in the ordinary course of business. Related risks have been analyzed as to likelihood of occurrence. Accordingly, a provision of JD 2,038,985 has been made (2021: JD 10,038,985).

During July 2019 the Group was notified of a lawsuit that was filed against the Group by another telecom operator relating to the fixed geographic numbers services. The Group has submitted its list of defense documents to the court. In the opinion of the Group's management and legal consultant the Group's position is strong and no provision is needed at this stage of the litigation.

The amount of legal cases as of December 31, 2021, above includes claims from the Telecommunications Regulatory Commission regarding differences in calculating the Government's revenue share for the years from 2000 to 2005. These cases were settled according to the agreement mentioned in Note (28).

### Guarantees

The Group has issued letters of guarantee amounting to JD 11,758,167 as of December 31, 2022 (2021: JD 21,693,522) in respect of legal claims and performance bonds.

## 30. Risk Management

### Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's long-term debt obligations with floating interest rates.

The Group is exposed to interest rate risk on its interest bearing assets and liabilities (bank deposits, bank overdraft and term loans).

The sensitivity of the consolidated statement of comprehensive income is the effect of the assumed changes in interest rates on the Group's profit for one year, based on the floating rate financial assets and financial liabilities held of December 31, 2022.

The following table demonstrates the sensitivity of the statement of comprehensive income to reasonably possible changes in interest rates, with all other variables held constant.

Currency	Effect on profit for the year by changing the interest rate by 1%	
	2022 JD	2021 JD
JD	42,268	(69,528)
USD	475	3,797
EUR	68	72

The effect of decrease in interest rate is expected to be equal and opposite to the effect of increases shown.

### Credit risk

The credit risk is the risk that other parties will fail to discharge their obligations to the Group. The Group manages credit risk with its customers by establishing credit limits for customers' balances and also disconnects the service for customers exceeding certain limits for a certain period of time. Also, the diversity of the Group's customer base (residential, corporate, government agencies) limits the credit risk. The Group also has a credit department that continuously monitors the credit status of the Group's customers.

The Group deposits its cash balances with a number of major high rated financial institutions and has a policy of limiting its balances deposited with each institution.

### Liquidity risk

The Group monitors its risk of a shortage of funds by performing analysis for cash projection in addition to performing a detailed analysis of accounts payables. The Group's current liabilities exceed its current assets. Management has assessed the liquidity risk associated with having the negative working capital and based on the analysis the management believes that the Group is not subject to a significant risk, in addition to the fact that the Group can manage its cash demands through the use of bank overdrafts and bank loans.

The table below summarizes the maturities of the Group's financial liabilities at December 31, 2022 and 2021, based on contractual undiscounted payment.

December 31, 2022	Less than 3 months JD	3 to 12 months JD	1 to 5 Years JD	> 5 years JD	Total JD
Trade creditors and amounts due to related parties	33,019,209	29,447,533	12,491,356	5,008,666	79,966,764
Telecommunications licenses payable	-	-	52,125,000	-	52,125,000
Balances due to telecom operators	14,620,019	2,126,261	5,016,065	-	21,762,345
Loans	100,493	15,502,933	29,687,112	40,460	45,330,998
Lease liabilities	5,836,949	2,589,762	24,753,824	20,894,524	54,075,059
Renewable energy liability	-	5,031,462	16,856,234	43,671,648	65,559,344
<b>Total</b>	<b>53,576,670</b>	<b>54,697,951</b>	<b>140,929,591</b>	<b>69,615,298</b>	<b>318,819,510</b>

December 31, 2021	Less than 3 months JD	3 to 12 months JD	1 to 5 Years JD	> 5 years JD	Total JD
Trade creditors and amounts due to related parties	30,390,364	31,595,196	42,764,034	9,747,776	114,497,370
Telecommunications licenses payable	-	-	52,125,000	-	52,125,000
Balances due to telecom operators	12,135,074	1,402,031	4,908,424	-	18,445,529
Loans	101,457	15,901,583	45,044,675	78,023	61,125,738
Lease liabilities	5,441,128	2,414,142	23,122,499	18,928,218	49,905,987
Renewable energy liability	-	4,306,468	16,986,403	48,157,977	69,450,848
<b>Total</b>	<b>48,068,023</b>	<b>55,619,420</b>	<b>184,951,035</b>	<b>76,911,994</b>	<b>365,550,472</b>

### Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Group's exposure to the risk of changes in foreign exchange rates relates primarily to the Group's operating activities (when revenue or expense is denominated in a foreign currency).

Most of the Group's transactions are in Jordanian Dinars and U.S. Dollars. The Jordanian Dinar exchange rate is fixed against the U.S. Dollar (US \$ 1.41 for JD 1).

The Group has loans payable in Euros and short term deposits in Euros. Changes in Euro exchange rates may significantly affect the loans values.

The table below indicates the effect of a reasonably possible movement in the JD rate against foreign currencies on the consolidated statement of comprehensive income, with all other variables held constant.

Currency	Effect on profit for the year by changing the ex-change rate by 5%	
	2022 JD	2021 JD
EUR	(24,441)	(24,381)

The effect of decrease in Euro rate is expected to be equal and opposite to the increase shown.

### Capital Risk Management

The primary objective of the Group's capital management is to ensure that it maintains healthy capital ratios in order to support its business and maximize shareholder value.

The Group manages its capital structure and makes adjustments to it in light of changes in business conditions.

Capital comprises share capital, statutory reserve and retained earnings, and is measured at JD 298,389,097 as of December 31, 2022 (JD 281,358,069 as of December 31, 2022).

### 31. Fair Values of Financial Instruments

Financial instruments comprise financial assets and financial liabilities.

Financial assets consist of cash and short-term deposits, receivables and some other current assets. Financial liabilities consist of term loans, payables and some other current liabilities.

The fair values of financial instruments are not materially different from their carrying values.

### 32. Comparative Figures

The 2021 figures have been reclassified in order to conform to the presentations in 2022. Such reclassification does not affect previously reported profit or equity.

## Future Vision

As a responsible digital leader, Orange Jordan achieved key milestones moving in the same direction as the global group's strategic plan, Lead the future.

We will continue to build on our strengths to generate more value, alongside deploying and capitalizing on our core business to keep ensuring unmatched customer experience, supported by our robust networks, advanced digital solutions, and applications.

Employees remain a priority for us, as we support their growth through career development and skills-building programs. Moreover, inclusion and diversity stand firm in our future-facing work environment.

Building on our strong financial and operational performance in recent years, Orange Jordan will remain a competitive player in the market and maintain a healthy financial position. We seek to sustain steady revenue growth in mobile and fixed and increase profitability by enhancing network infrastructure, expanding the customer base, and innovating new products and services.

In terms of investments, we will focus on deploying the 5G network and expanding fiber coverage with a great emphasis on reduced costs, to ensure better returns for shareholders.

To achieve our ambitions, we will launch and scale new growth engines, in addition to embracing a new company model guided by responsibility and efficiency. Transforming Orange Business will be key to accelerating growth in the enterprise segment and further strengthening our position in cybersecurity.

We are entering a new era where Orange will embed Environmental, Social, and Governance (ESG) in every area of our business model to enhance risk mitigation, opportunity optimization, and sustainability.

Orange Jordan is honoring its commitment to the planet by working to meet our zero-carbon goal by 2040 and become a green company. With our digital programs' remarkable expansion, we look forward to empowering more people and communities to collaborate, innovate, and drive sustainable development.

Our vision for the future is shaped by our belief that business performance cannot exist, nor thrive, without responsibility that translates into actions.
